

Automation for sliding gates

Sliding gates

Residential use

Safe and user friendly technologies

LIVI/N is an operator for **residential sliding gates** in **230V** and **24V**.

LIVI/N is:

- **discreet**: is the smallest of our operators for sliding gates and is perfect for tiny spaces
- **robust and reliable**: materials used all of the highest quality
- **silent**: thanks to its internal precision mechanics
- **safe and practical**: in case of power failure, the motor is equipped with a personalized releasing key compatible with BLINDOS device, for the unlocking of the gate from the outside

The use of the **DE@NET technology** guarantees **maximum safety** and **compliance to European standards** in the field of impact forces, for the **230V** version, thanks to the presence of the **encoder**.

in compliance with
EN12453 and EN12445
standards in the field of
impact forces

3 years warranty on
motors and control
boards

Safety unlocking device with personalized key

Internal mechanics in steel with ball bearings

Check on the movement of motor by encoder
which guarantees precision and safety

Other features:

- version with **magnetic limit-switches** (less breakage and oxidation)
- quick version (**BOOST** models) which reaches up to **16m/min**

Example of typical installation

Suggested accessories

AURA

LINEAR/XS

GT2M - GT4M

DIGIRAD

BLINDOS

PILLY

DEAuser

DEAuser is the app dedicated to private user which enables checks on the installation through smartphone (nearby the automation).

Did you forget either the code of the keypad or the key selector?
No problem! Your smartphone becomes the tool to open all your doors!

More **practicality**:
your smartphone
opens all doors!

> Opening without code or key
(Nearby the automation)

NET-NODE

The **DEAuser** app is usable thanks to the **NET-NODE** wireless device put either inside the motor or on the control panel (depending on the automation model). This means:

- **NO DEVICE TO BE ADDED OUTSIDE YOUR HOUSE:**
there is no need to carry out works of masonry at the entrance, no holes and no wiring
- **SAFETY AND PROTECTION AGAINST VANDALISM:**
unlike of the wired devices, with NET-NODE there is no possibility to be tampered
