

Pants Hanging Guide

When pants are hung correctly on the hangers they are easy to see and they do not bunch up the racks. Follow these easy suggestions for hanging pants on the hanger.

- Use a sturdy wire hanger or thin plastic one.
- Use the 1” safety pins.
- Place the safety pin through the front and the back waist band.
- Keeping safety pin open, clip the safety pin to the top of the hanger so that the pins sit at the top of the hanger and the pants are secure and do not slide from side to side.
- Use sturdy pins.
- The tag for the pants will go on the top right, with the hanger hook facing to the left.
