

# Modern British Party

## How safe is it to live in a London Borough if you are female?

The short answer, it is not safe. These statistics have been received from the Metropolitan Police under a Freedom of Information request.

*From the year after the Labour Party came into power in 1998, through the coalition government to the Conservative Party holding the reins in 2019 these are some of the main statistics:*

During this time, the number of officially recorded sexual assaults including rapes was staggeringly just under **110,000**. Up to 67% of these women were White and up to 23% were Afro-Caribbean.

Now, we would like to give you some reassurance and say the perpetrators had proceedings brought against them but despairingly we cannot. The statistics are getting worse in this area, in 1998 22% of these crimes saw some attempt to resolve them through prosecution, in 2019 this has gone down to only **8%**!

## Who should you look out for, who are the most dangerous groups attacking women?

At least 45% but up to 77%\* of perpetrators are from the BAME community

At least 23% but up to 45%\* of perpetrators are from the White community

So, the vast majority of victims are white, and the vast majority of perpetrators are from the BAME community. This will not be a surprise to many when you look at the ranking of countries in terms of how dangerous they are for women, with India number one and Pakistan number six (Thompson Reuters Survey, 'TRS', along with Arabian and African nations (also very near the top of the TRS) all groups now forming a substantial part of the UK's population. That is Politicians for you, they rarely seem to think of the consequences of their actions.....

\*- see Statistics

## Which are the Boroughs where women are most and least likely to be raped and sexually assaulted (Data – numbers = number of rapes and sexual assaults on women during 2019)

Most dangerous Boroughs

Westminster	457
Southwark	364
Lambeth	354
Croydon	326
Newham	326
Hackney	323
Greenwich	288
Brent	281
Tower Hamlets	280
Islington	270

# Modern British Party

and the safest (**Data – numbers = number of rapes and sexual assaults on women during 2019**)

Havering	168
Kensington & Chelsea	167
Hammersmith & Fulham	163
Merton	150
Kingston Upon Thames	147
Bexley	136
Harrow	122
Sutton	114
Richmond Upon Thames	91
Heathrow	31

Not everyone can afford to live in Richmond so Appendix A below will provide you with a complete list.

## **Are any Boroughs becoming more dangerous than others looking at recent trends?**

The short answer is no, between 1998 and 2019 the number of victims in percentage terms compared with the total number of victims has changed very little.

### **Statistics**

According to the Police statistics, over 14,500 perpetrators entries were “blank” i.e. the Police presumably simply did not complete the details. Interestingly, this lack of recording of these statistics has risen by **1761%** since 1998, your guess is as good as ours as to why this is.

A further 1,700 perpetrators had an “Unknown” ethnicity – surely a reasoned guess would have helped.

The Police have commented “suspect's ethnicity is based on the perception of the victim and/or witnesses and therefore may not be as accurate as self defined ethnicity.” Fair enough, but that doesn’t answer why these “blank” statistics have risen by so much.

## **Are there any groups of people becoming more dangerous than others looking at trends over this time?**

Yes, Oriental, Arabian & Egyptian average at least a 229% increase regarding the number of their victims between 1998 and 2019.

Afro-Caribbean and Asians average at least a 127% increase regarding the number of their victims between 1998 and 2019.

As a comparison the number of victims being attacked by the White population has increased by at least 35%.

# Modern British Party

NB A word of caution – the statistics will be higher as there are 31% of 2019 perpetrators where the Police have not recorded an ethnicity.

## **Our Plans**

Have no doubt we guarantee to substantially reduce the numbers of rapes and sexual assaults on women in the UK. Including, as soon as we are in charge of the Country or we have the resources available to do so, we will create an App that you can press when you are out on your own to monitor your location until you arrive safely at your destination when you can switch the App off again. A little peace of mind in an increasingly soft and socialist society.

## **Conclusion**

We get so angry with the blatantly incompetent Politicians playing lip service at election after election when questioned about crime and punishment but is clear for all of us to see, the statistics do not lie. To the 90,000 victims yet to receive justice , were are so sorry our great country has let you down – it may be too late for us to help you when we win a general election, but, please vote for us to save the next victim. Although the Police make mistakes, do not target your anger at them, they are limited by the law and resources. As we say the main culprits are the staggeringly incompetent Politicians, who have been running this Country for far too long.

To make these events so rare and to avoid your daughter, wife, mother, girlfriend, grandmother, or friend becoming a victim, please support and vote for us.
