

## Small Human Beans

A Pod Based Learning Experience

### **Social-Emotional:**

Social skills help establish the relationship between two or more people. Emotions refer to the expression of one's feelings. Social-Emotional skills enable children to engage in meaningful social interactions with parents, caregivers, peers and others in their environment.

### **Physical:**

A summary of a child's motor development. Motor skills involve the use of the body's large and small muscles to perform basic movements.

- Gross Motor
- Fine Motor

**Communication:** Communication is more than speech and language, it includes the effective use and understanding of one's facial expressions, eye contact, body movements and gestures as well.

- Expressive
- Receptive

### **Cognition:**

A measurement of skills and abilities that are conceptual in nature. Cognitive skills for this age group include abilities such as:

- Attention
- Memory
- Visual Discrimination/Sorting/Matching
- Problem solving

### **Adaptive Behavior:**

Self-Help Skills or Adaptive Behavior is a broad domain of development that refers to a child's ability to function independently in their environment.

- Self-help skills
- Social responsibility
- Social adjustment
