

## PREVENT RANSOMEWARE MITIGATE EMAIL PHISHING

Adura is committed to delivering cyber security solutions tailored for business success.

We use a holistic and complete consultative approach to tailor effective mitigation of email security risks across your organisation. Through field proven process, our dedicated cyber security professionals will work with you to design and implement a phishing program that will identify weaknesses in your staff awareness and address these vulnerabilities through our customer training materials.

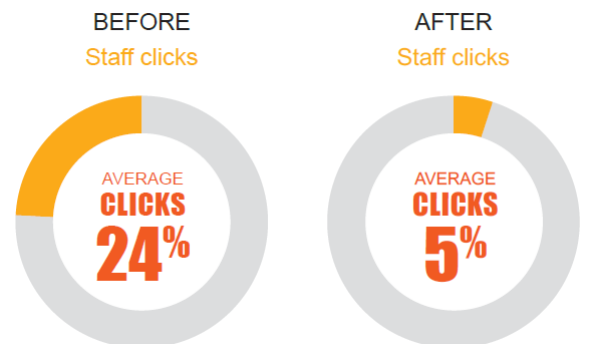

These include managed phishing simulation, risk assessment and security analysis, complemented by customised workforce training to enable your employees to be the first line of defence for your business.

Run an email phishing assessment with Adura now, to get the most complete picture of your company's susceptibility to email threats and ransomware.

## EMAIL PHISHING ASSESSMENT

Mitigate the threat of ransomware by protecting your business and its data; strengthen your defences against enterprise and targeted email phishing.

### PROOF IS IN THE NUMBERS

Our Email Phishing Assessment is designed to increase employee awareness of phishing threats. We target to reduce the percentage of staff clicks to below the 5% industry benchmark.

DON'T BE ANOTHER  
PHISHING STATISTIC

96%

of phishing and pretexting attacks are delivered in emails

accounting for

96% of social incidents

93% of breaches

# DISCOVER OUR 4-STEP CONSULTATIVE APPROACH

## CAMPAIGN PLANNING

1

By understanding your company's profile, including your workforce, we will plan and develop the right campaigns to test and assess email related vulnerabilities.

## PHISHING SIMULATION

2

Simulated attacks are conducted with emails and webpages designed to mimic real-world phishing attacks, to determine levels of susceptibility.

## ASSESSMENT & ANALYSIS

3

User's actions to each email are tracked, with baseline and key metrics (open-rates, click-rates, credential-posting) established to gauge security awareness.

## TRAINING & REPORTING

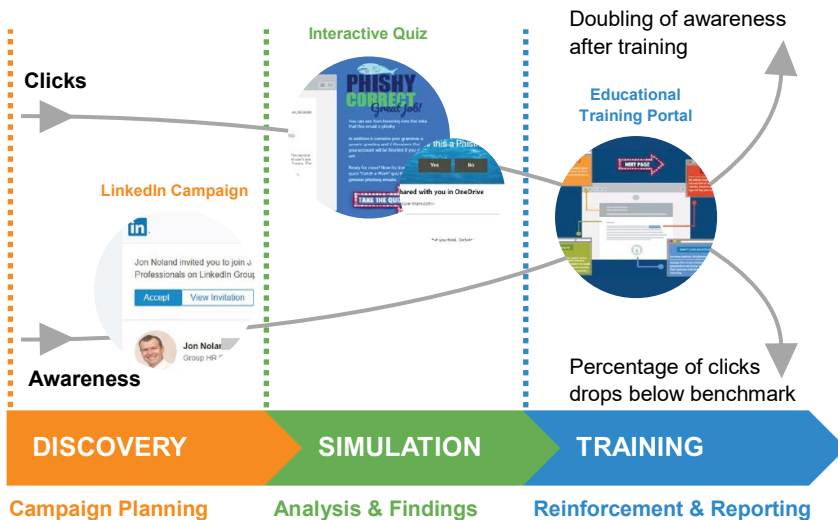

4

Awareness exercises and training programmes are developed to equip your employees with the knowledge to protect themselves and the company from phishing attacks.

## MITIGATION OF EMAIL THREATS IS A JOURNEY

Our comprehensive program is designed to help your company achieve its desired security outcomes, such as increased overall awareness of phishing and ransomware threats, and a reduced number of employees likely to click on a phishing email.

## JOURNEY WITH ADURA FOR DESIRED OUTCOMES

### RISK MITIGATION

Customised simulation campaigns with follow-up remediation activities will mitigate risk exposure from employees who might fall for phishing attacks.

### KNOWLEDGE TRANSFER & RETENTION

Dedicated training resources such as interactive quiz and an awareness training portal enable effective knowledge transfer and reinforcement among your employees to successfully keep phishing threats at bay.

### COMPREHENSIVE PHISHING PROTECTION

The workforce training programme will heighten employees' awareness of phishing, and instil in them the knowledge to avoid falling prey to email phishing attacks.

## ABOUT:

Adura Cyber Security provides cyber security consultancy to help organisations in Asia to strategise and maintain a security posture that is effective, sustainable and tailored to meet the needs of their business.
