

# Who's who in the works of Francis Brett Young

## LATEST ADDITIONS: *DEEP SEA; FAR FOREST*

Francis Brett Young's world is rich in characters. In the index so far created the number of characters in each book/short story range between 4 and 559. Many of these are his own creations, who frequently appear, in greater or lesser roles, across several books. A large number are actual historical characters – the real people whom he introduces into his stories. These illustrate Young's wide interests, embracing architects, artists, bankers, diplomats, engineers, financiers, inventors, monarchs, musicians, physicians, politicians, revolutionaries, scientists, soldiers, sportsmen, surgeons, writers and many more...

This is an on-going project on which a number of society members are currently working. It will be up-dated as each new index is completed, when the descriptors of Young's own character creations may well be expanded as more information becomes available.
