Catheterization Tray

QUALITY YOU CAN COUNT ON

Footprint Medical catheterization trays feature high quality components to provide optimal neonatal care.

- Neonatal general procedure tray especially for umbilical vessel catheterization
- Compact bi-level tray design for ease of storage and transport
- Medical grade disposable stainless steel instrumentation
- Cleansing Swabs, Umbilical Tape, Stopcocks and Suture provided in easy access compartments

*Umbilical catheters available separately

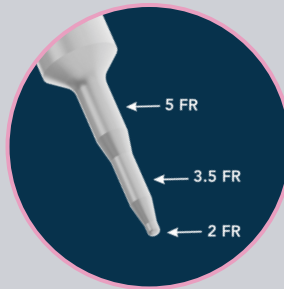

Maximum Barrier Drape

Exclusive "Hybrid" drape provides maximum barrier protection with visualization.

Umbilical Vessel Probe

With stepped-tip design to aid insertion of 2.5Fr to 5Fr catheters.

Medication Labels

Color coded Medication/Line labels and stopcocks.

Neonatal Micro Forceps

Both half and full-curved options provided.
