NOW FEATURES**

Umbilical Vessel Probe
with stepped-tip design

Umbilical Catheters

Footprint Medical umbilical products offer unique features that allow clinicians more convenience with accuracy in placement, tracking and maintaining the catheter.

Easy Identification Hub

is clearly marked with "UMB" and the French size to readily identify the catheter type and size.

Integral Sliding Clamps

allow the clinician to safely facilitate line changes.

360° Degree Markings

around the catheter body provide easier visualization for accurate placement depth and tracking.
