

Silicone Peripherally Inserted Central Catheter with Peel-Away Introducer Sheaths

The hub is clearly marked with "PICC" and French size to readily identify catheter type.

The Footprint Introducer sheaths have unique design features to enhance first stick success.

Peripherally Inserted Central Catheter

- Designed especially for neonatal/pediatric patients
- Silicone catheter with integrated extension set
- Soft stabilization wing for enhanced securement
- Indelible markings every centimeter
- Fully radiopaque
- Latex and DEHP free

Introducer Sheath

- Notched needle with minimal lie distance for immediate visualization of flashback designed to increase first stick success
- Low profile, compact introducer designed to enhance small vein access
