Polyurethane Enteral Feeding Tube

Protection you can count on

Designed to support catheter placement, visibility, and ongoing management

- Polyurethane tube with silicone overlayed hub designed to provide secure enteral only connections
- Labeling supports ISMP recommendations that all distal ports and tubing of access lines clearly indicate what is the use of the port/line
- Bold, indelible markings every centimeter
- Proximal hubs made of inert Polypropylene for excellent chemical resistance and mechanical stability
- Polyurethane's tensile strength allows thin wall construction designed for increased flow rates and decreased clogging with proper maintenance
- Latex and DEHP free
- Integrated silicone closure plug for easy cleaning and reliable sealing.
- Radiopaque stripe for confirmation of tip placement by x-ray
- Smooth, rounded tip surface

40CM ENTERAL FEEDING TUBES
