

ZIPPER FRUIT TREE PEST PROTECTION COVER

“Check your fruit without removing the cover”

The cover is of high-tensile-strength polyethylene mono filaments with UV stabilised and durability. It has strong tucked edges and is flexible, light and easy to spread. Unique screen structure results in maximum air circulation and the reinforced edges will keep its strength and stability. Weight of the fabric is 55GSM (grams per square meter). No. 5 resin zipper tensile strength is 500N for all weather. ***With proper care the cover should last a number of seasons. All covers come in a storage bag and Velcro strap.***

The cover comes in five sizes:

1. Small 1.0m square top with 1.5m drop.
2. Medium 2.0m square top with 2.0m drop.
3. Large 2.5m square top with 2.5m drop. “two Zippers”
4. XLarge 3.0m square top with 3.0m drop. “two Zippers”
5. XXLarge 3.5m square top with 3.5m drop. “two Zippers”

Undo zipper place cover over tree

gather around trunk of tree fasten with Velcro strap

without removing cover undo zipper inspect fruit

The cover is recyclable and environmentally friendly. With a gap size of 1.08 x 1.28mm these covers protect against pests, such as Apple Maggot, Codling Moth, Pecan Weevil, Leaf Miner, Aphids, Fruit Fly, Birds and Bat penetration; yet provides maximum possible air flow. Provides protection against climatic conditions such as hail, snow and wind penetration. It has good ventilation and is water porous. Enables a very good growing environment for plants free of pesticides saving costs and optimizing yield and fruit quality.

Note: When installing the cover, it is important not to cover the tree until flowering has finished and fruit is set. This will enable pollination to be completed resulting in a healthy crop. After harvest remove the cover and store away for use next year.
