SAMPLE OVERVIEW

Level Up - To Go Up

This session will equip attendees to identify their assets and liabilities for the purpose of developing themselves to leverage for where they want to go. Attendees will leave inspired and motivated to improve and empowered to reach U.P. -unlimited possibilities.

Creating Company Culture

Corporate culture is collection of ideals, philosophies and experiences that help to create companies that people want to be a part of. Building said culture may require deconstruction and then reconstruction; clearing the ground and then laying a new foundation. In this session, we will engage leaders in identifying their current contributions to company culture and identify ways to bolster essential cultural pillars through word, deeds, and actions. The goal is to create a peaceful environment of productivity and progress.

TESTIMONIALS

I wanted to make Amazon History in the Black Employee Network so I invited Dr. Linda. With the theme Level Up: Getting Over What is Holding you Back, Dr. Linda executed to the highest standard. I always know it is a good presentation when the associates make it a point to tell me that this person needs to come back. The associates left empowered and full of new knowledge.

Michelle Craig
Procurement Operations Analyst

Dr. Linda spoke at our Women's Council of Realtors luncheon and she was incredible. This was in the middle of the pandemic and many Realtors were in a dark place where they needed a recharge. I can truly say we all left fully recharged and ready to tackle the current Real Estate market. She has that voice that boasts influence and authority. Everyone stayed on the end of their seats the entire time. Pastor Linda spoke with high energy, clarity and conciseness. As Women's Council stands a year later after Pastor Linda graced us with so many powerful nuggets, we are already ready to bring her back.
