

Rentable gives you flexibility and transparency, when you want it the most.

Flexible Deposit Payment Plan

No need to pay thousands upfront on move-in. Residents have the option to pay their security deposit over the term of the lease with Rentable's DepositBuilder.

Rentable will test your bank account and transaction history using open banking technology to see if you qualify for DepositBuilder. If you prefer or don't qualify - then you can pay a traditional cash security deposit through the same platform.

Electronic Payment & Disbursements

No more checks, forwarding addresses, or snail mail. Using Rentable, you receive your deposit funds 10x faster at the end of your lease term.

Increase Transparency over Your Deposit Funds

No need to wonder about where your money is. You'll be able to track your deposit funds throughout the lease term. The Rentable platform allows you track interest accrual (if applicable), see where the deposit funds are held, and get a breakdown of any deductions at the end of the lease.

Why DepositBuilder:

"The financial aspect of moving in is really stressful for me and my friends. This is our first job out of college, it's not like we have all this saved up."

When I saw that I could pay my deposit in installments... It was such a sigh of relief and so helpful for me."
