

Boanerges Power Company (BPC) is a Renewable Energy Developer which builds the Multipowered Load Balancer (MPLB), a platform (structure or building) which integrates multiple sources of energy and works 24/7/365.

Product

- MPLBs use solar, wind, hydro, batteries, & hydrogen to sustain power
- MPLBs have a footprint of 25ft x 25ft and 50 ft tall & can fit into a small space
- It is a structure built to look like adjacent buildings (hides in plain sight)
- MPLBs can also be embedded within new construction & clustered for scale
- It provides 100% of power needs as main power
- MPLBs can be integrated back-up systems
- It can be grid-tied for Demand Response or Active Backup Systems

Core competencies

- Make onsite renewable energy investment possible
- Practical for urban, suburban, industrial, rural, or remote deployments
- Use new technology to move buildings into green energy
- Provide energy independence
- Provide carbon reduction without sacrificing Reliability
- Enhance operational Resilience

Differentiators

- MPLBs increase the value of your property as a property improvement
- MPLBs cluster for greater power production while preserving space & fuel
- A Renewable Choice for clients with space & branding challenges
- 100% Emissions Free & No maintenance costs
- Very long-life, 100+ years, hardened against attacks (physical, EMP, Cyber)
- Built to look like adjacent structures, hides in plain sight
- Applicable for residential, industrial, mixed-use & infrastructure

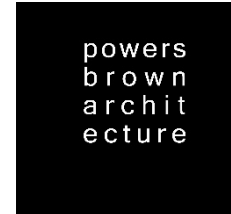

Benefits

- Automated Operations with multiple layers of physical & cyber security
- Redundant Systems Architecture
- An Independent Charge + Battery System for Energy Resilience
- Never pay an electric bill again
- No downtime or losses due to power outages
- Service costs are set fee upfront, no future maintenance or repair costs
- Multiple versions based upon the geography of the location & scalable

Applications

- Electric Utility Distributed Energy Resource (DER), Purposed-built facilities, Commercial Real Estate, Industrial & Manufacturing Warehouses, Municipal Buildings, University Campuses, Mixed-Use multi-story residential, Historic Property, Rural Residential, Remote Communities (Mountains, High plains, Desert, Arctic, Rain Forest)
