DO's

DO take leftover hazardous household chemicals to your approved hazardous waste collection center for disposal.

DO practice water conservation.

DO have your tank pumped out and system inspected every 2-3 years.

DO divert roof drains, surface water from driveways and hillsides away from the septic system.

DONT's

DON'T allow anyone to drive or park over any part of the septic system.

DON'T use your toilet or drains as trash cans by dumping nondegradables down.

DON'T make or allow repairs to your septic system without obtaining the required Health Department permit.

DON'T grow trees or shrubs over your drain field (grass is ideal).
