FROM DR. VARNHOLT

"Cataract surgery is a once-in-a-lifetime chance to reduce your dependence on glasses."

Dr. Elias Varnholt (fictional example)

0% financing available.†

For qualified applicants through Corvane Care Plan.

* Medicare and most insurance cover cataract surgery with a standard lens. Lens upgrades and related testing are not covered. Medicare Part B covers one pair of standard-frame eyeglasses after each cataract surgery with a lens implant. Results vary. Some patients experience glare, halos or reduced contrast, especially at night, and some still need glasses for certain tasks. A full-range lens may not be suitable for patients with certain eye conditions.

† $89/month is based on one eye at $3,900, financed for 60 months at 12.9% APR, for qualified applicants through Corvane Care Plan. 0% APR promotional financing is for 24 months, for qualified applicants; if the balance is not paid in full within 24 months, interest at 26.99% APR is charged from the purchase date.

‡ Per eye, over ten years.
