Laminate Standards:

The laminates shown in this guide have been created for digital transmission. Different devices may affect the appearance of these colors. If an exact color match is required, you should obtain sample chips from your Irwin Seating Company representative. It is recommended that color selections be evaluated using sample chairs in the same environment and lighting conditions that the seating will be installed in.

Laminate surfaced products have lacquered edges to match the dominant color in the laminate. For a sample please contact your representative or the factory. Lecture room tables and modesty panels are not lacquered and finished as required with a variety of materials.

High-pressure decorative laminates are available in solid colors, wood grains and patterns for interior use on vertical and horizontal surfaces.

Both Nevamar and Formica brand laminates meet or exceed the requirements of ANSI/NEMA publication LD 3 current edition.

Nevamar Horizontal Surfaces:
Thickness: H-4 (HGL) Grade = 0.039"
($\pm .005$); (1.0 mm $\pm .12$)

Nevamar Vertical Surfaces:
Thickness: 0.028" ($\pm .004$); 0.7 mm
($\pm .10$)

Formica Horizontal Surfaces:
Thickness: H-4 (HGL) Grade = 0.035"
($\pm .005$); (1.0 mm $\pm .12$)

Formica Vertical Surfaces:
Thickness: 0.027" ($\pm .004$); 0.7 mm
($\pm .10$)
