# ABOUT BDP

## VISION

The Bridge Dance Project is a grassroots network supporting the whole-person health and wellness of competition and commercial dancers and teachers by providing current dance medicine and science information.

## MISSION

The Bridge Dance Project builds bridges between the competition and commercial dance community and the dance medicine and science community by providing easily accessible, readily applicable, and personally empowering information.

## THE SIGNIFICANCE

The knowledge we communicate and transfer can contribute to increasing the longevity of dancers' careers and help them navigate the demands of dance with a 360-degree view of the dancer. We are passionate about our efforts because properly applied education is powerful and will lead to positive and healthy changes for the current and future generations of dancers.

# SUPPORT OUR MISSION!
