IMMUNOTHERAPY VIALS PREPARED BY: MIKE TANKERSLEY, MD, MBA
SIGNATURE: *Mike Tankersley*, MD, MBA
PRESCRIBING PHYSICIAN: MIKE TANKERSLEY, MD, MBA

Each vial set (green 1:1,000 v/v, blue 1:100 v/v, yellow 1:10 v/v and red 1:1 v/v) will be numbered vials 1-4 as applicable and labeled with the contents as written in the prescription in accordance with national practice parameters. Doses used are to achieve therapeutic, effective doses and will consist of 50 injections per vial set for the first 12 months. One vial set is defined as a red, yellow, blue and green vial in accordance with national practice parameters. A single patient may require 1-4 vial sets depending on the number of positive allergens on skin prick testing. A prescription is written separately for each vial set. In summary, the preparation of 1 vial set (95165) is 50 units, 2 vial sets is 100 units, 3 vial sets is 150 units and 4 vial sets is 200 units. In some cases, due to carrier unique edits, 4 vials sets may be submitted as <200 units due to annual limits for 95165.
