

Callum Worsfold

Artist and Teacher

Bio

Callum is a young and emerging artist whose work crosses between mediums and subjects frequently but is mostly grounded in representation and observation.

Callum primarily paints from life, but has been known to dabble in abstract expressionism, sculpture, surrealism and illustration.

One of Callum's Major interests is Psychology which he continually alludes to throughout his practice, often through the use of Symbolism.

Although his work can be hard to pinpoint, one repeating motif he returns to is the interior, which is seen as a representation of the individual's Psyche.
