

FALL 2025

Montecito Homeowners Association

New Parking Policy Adopted by the Montecito HOA

At the recent Board Meeting held on September 11, 2025, the Montecito Homeowners Association officially adopted a revised parking policy to improve safety and traffic flow throughout the community. Key highlights of the new policy include:

Resident Parking Requirements: All residents must utilize their garages and driveways to full capacity before requesting permission to park excess vehicles on the street.

Guest Parking Rules: Guests may only park on the sidewalk side of the street and must display a valid parking permit, which is limited to 72 hours.

Towing Enforcement: Vehicles violating the parking rules may be tagged and towed after 48 hours of notice, or immediately if they pose a safety hazard.

Additional Red Curbing: In addition to the policy update, the Board has painted curbs throughout the community to enhance visibility and assist drivers in navigating safely. Please refrain from parking in red zones and review the full parking policy to avoid violations when it arrives. Enforcement of the new rules will begin later this year, so now is the time to familiarize yourself with the changes.

Lighting Costs: Why Gas Lamps Are Still the Most Expensive Option

In many communities, traditional gas-powered lamps are valued for their aesthetic charm and warm glow. However, when it comes to cost efficiency, they often fall short compared to electric and solar lighting options.

Gas-Powered Lamps: High Ongoing Costs: Gas lamps typically operate 24/7, consuming fuel continuously. This results in high annual costs due to both fuel usage and maintenance. For communities like ours, where gas lighting remains the highest annual expense, the financial impact is significant. In 2024 the cost of natural gas was \$321.24 per homeowner.

Their high operating costs make them the least economical choice. Transitioning to electric or solar lighting could significantly reduce annual expenses for every homeowner. Scan the QR Code for more details:

How to Convert your Lamp
