## Why Trust DeepSeas

**You'll get real cyber experts that live to remove harm from the cyber seas.**

Cyber defense is all we do, and we are fully vested in protecting your business from cyber harm. We hire, develop, and deliver an unmatched team of cyber security experts. We defend our clients against the most hostile global adversaries 24x7x365.

**Your peers trust us to protect them against the most sophisticated adversaries in the world.**

Our clients are your peers, and while you may face similar cyber criminals, you likely have nuanced operational challenges. We'll meet you where you are and configure our offerings to your organization's specific needs as your journey toward trusted business operations

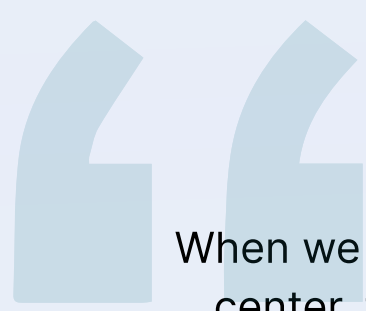

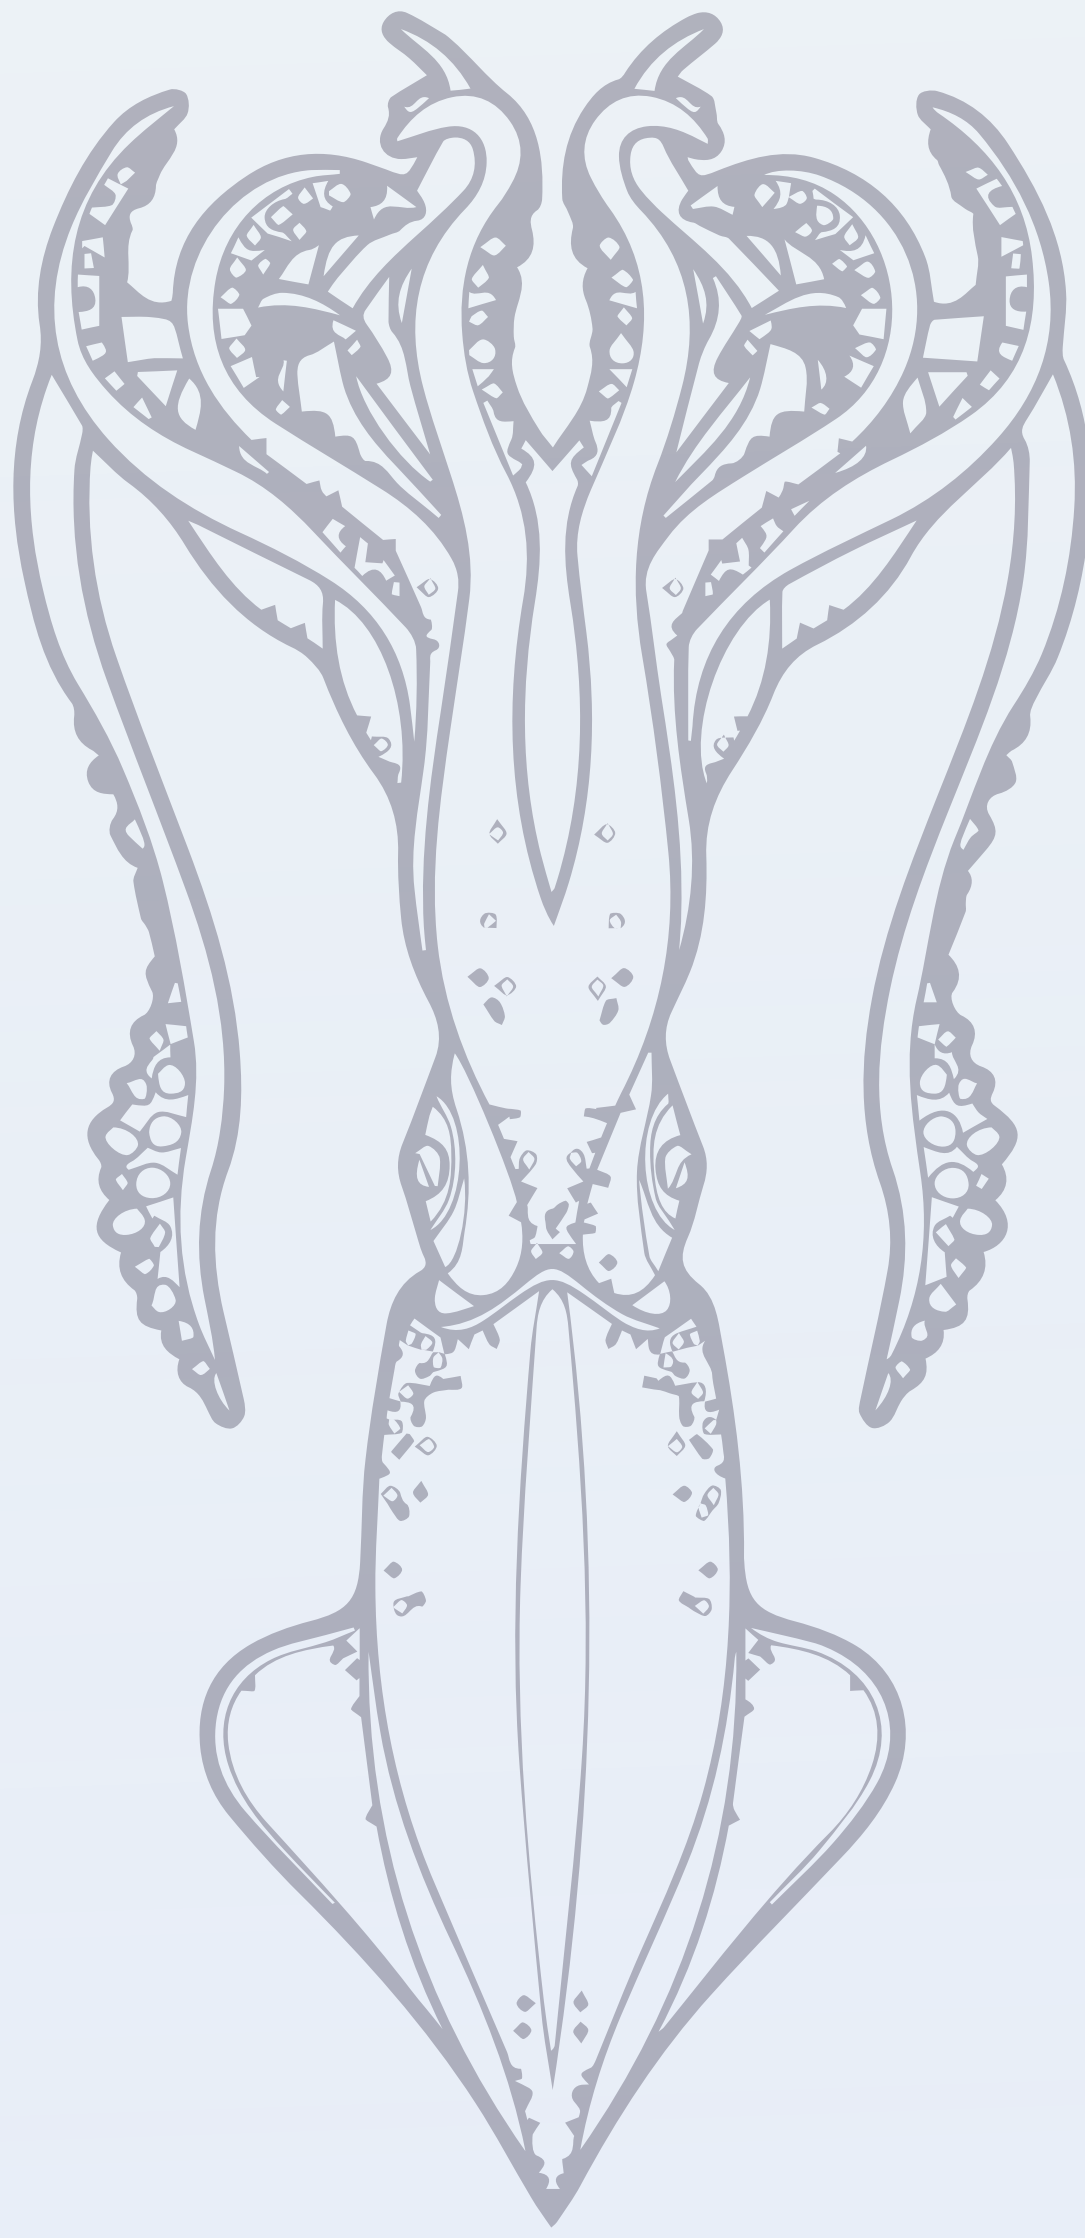

Why DeepSeas

**It took decades to build an implementation methodology that you'll love, and it was worth it.**

Ultra by DeepSeas is our unique service delivery methodology that enables cyber defense solutions to be personal, reliable, transparent, and cost effective. It has been built through decades of experience in driving complex managed cybersecurity programs across multiple industries. The Ultra methodology emphasizes high-value outcomes that address your key areas of cyber risk.

**You'll enjoy the benefits of a deep partnership ecosystem that is built on long-term relationships.**

We partner with innovators to provide you with access to leading capabilities through a single trusted partner. Proven capabilities matched with our trusted partner relationships will deepen and mature your security program. As a fully dedicated, partner-focused company, DeepSeas is committed to building long-term and valuable partnerships that are customizable.

## Security Analyst quote

When we brought in DeepSeas to maintain and run our security operations center, they came with a very deep background, not only technical but operational as well. DeepSeas is able to bring in a high caliber of people, systems, engineering, and solutions to help us be successful.

Dr. Tina Briney, Director SOC, IR, IT Security & Data Privacy

## In-Depth Managed Detection & Response is Within Your Reach

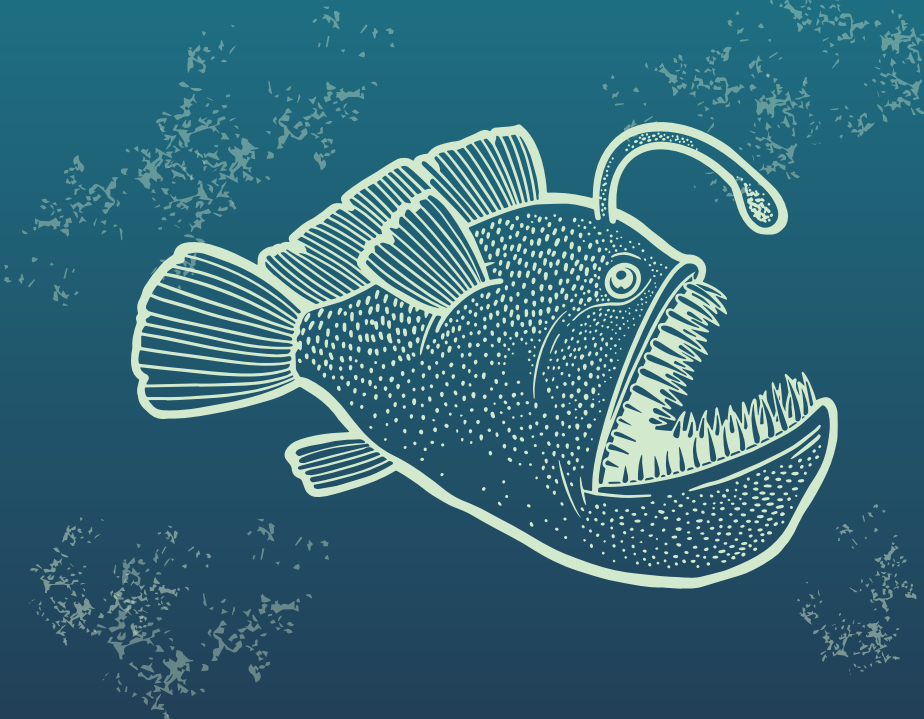

**Are security visibility gaps creating unacceptable risk?**

Achieve full view of deep threats with broad attack surface coverage.

**Are incomplete and manual security procedures increasing attacker dwell times?**

Minimize business impact risks through fast and complete threat response.

**Are your limited security team members overworked and stressed?**

Overcome staffing challenges with 24/7 access to a deep force of cyber talent.

**Are sub-optimized security tools limiting your cyber defense capabilities?**

Optimize existing security investments through the DeepSeas cyber defense platform.

## Why DeepSeas

In the DeepSeas, heart rates go down, careers take off, and security programs mature.

### The Nerd Runs Deep Here

Our expertise in cyber defense and threat analytics is unmatched, and there is no depth that our experts won't go to protect you and provide you with intelligence, insight, and measurable results.

Meet Our Experts

### Don't Take Our Word For It

"As IT and security leaders struggle to develop and scale security programs to keep up with a growing attack surface, managed detection and response (MDR) providers are bringing necessary expertise, processes, and tools resulting in overall security program growth and improved outcomes. More than simple service providers, partnering with MDR vendors in the mid-market is quickly becoming a core operating strategy in the growth and maturity of modern security programs. Vendors like DeepSeas have an opportunity to contribute more than MDR/XDR, helping organizations efficiently manage the business risk posed by cyber threats."

Dave Gruber, Principal Cybersecurity Analyst at Enterprise Strategy Group

### Ultra by DeepSeas: Our Unique-to-You Delivery Methodology

Built through decades of experience in driving complex managed cybersecurity programs across multiple industries, Ultra is a perceptive service delivery methodology that is offered exclusively to clients of DeepSeas.

#### Personal

Ultra is configured to your business, industry, and technical capabilities. It will feel like a natural extension of your team, not an extension of your software stack.

#### Reliable

Ultra provides comprehensive cyber defense that delivers reliable and consistent results. Joining DeepSeas means that your mission is our mission. We continuously focus on the small details that make a big difference. This includes regularly validating our visibility into your systems, applying both false positive reduction methods as well as false negative reduction methods. Quality assurance is our passion.

#### Transparent

Ultra provides outcomes that are easy to understand, observe, and measure. A service delivery manager, technical account manager, and named security executive are all available to support you. Metrics dashboards, performance reports, and intelligence briefings are curated to help you understand the state of your cyber defense and what we are doing daily to support you.

#### Cost Effective

Ultra focuses on maximizing ROI through applying repeatable assets and tools. You will benefit from intelligence being captured across hundreds of organizations. The days of rip and replace are over - we focus on starting with the tools you already have in place.

Ultra takes a full life cycle approach from solutioning, implementation, and customer onboarding to steady state run with a managed services focus. Our methodology emphasizes high-value outcomes that address your key areas of cyber risk. We provide engineering resources and project managers to ensure a smooth transition and onboarding process while offering a 24/7 detection and response focused team. The Ultra implementation capabilities model is designed to align with the ISO 27001 standard, ensuring that core services are easily consumable and properly mapped. Each capability within a tower has three distinct dimensions based on the ITIL model, including Plan (Assess/Architect), Build (Systems, processes, interfacing/config), and Run (Managed Service).

### Ultra is grounded in the DeepSeas Professional Services Mission

The professional services crew at DeepSeas provide a depth of professional services that cannot be found anywhere else in the cybersecurity industry. By applying both technical and service delivery expertise to every interaction, and blending our rich history of proven practices with our innovative approach to delivery excellence, our mission is to exceed your expectations at every encounter, every time.

#### We'll be Beside You at Every Step of Your Way

- Account management
- Relationship management
- Contract compliance
- Service delivery
- Technical onboarding
- Transfer to operations
- Technical support
- Client touchpoints and communications
- Client and vendor escalations
- Identifying solution gaps, contract renewals

### The DeepSeas Difference

We solve some of the hardest cyber technology problems, through proprietary solutions, including intelligence distribution, anomaly detection, tools orchestration, and unique staffing strategies.

#### Deep Capabilities

- DeepSeas will implement leading tradecraft methods into your program to enable fast and efficient response.
- Our comprehensive capabilities support detection of both known and unknown threat vectors.
- DeepSeas handles the "last mile" of your cyber defense by going further in response than any other service provider.

#### Broad Scope

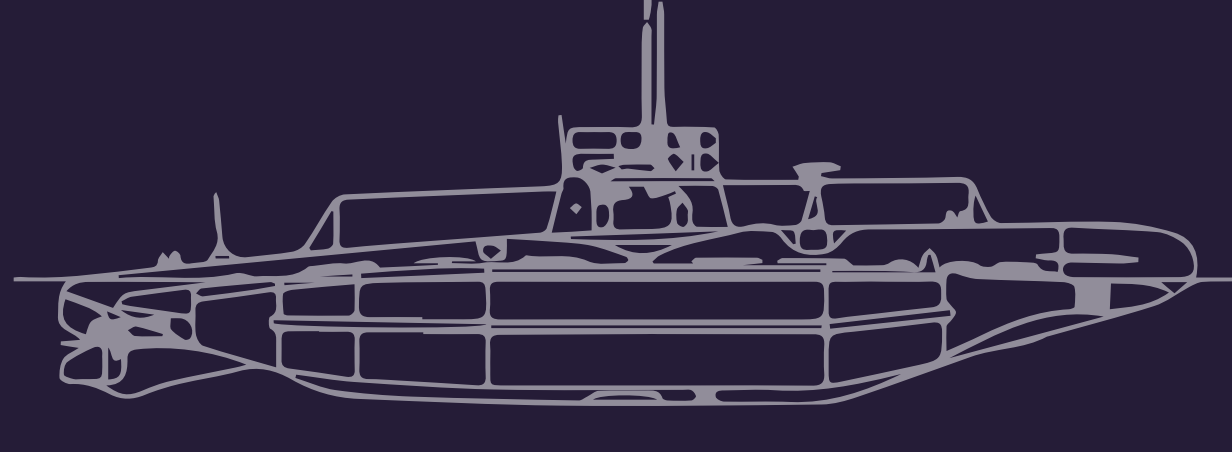

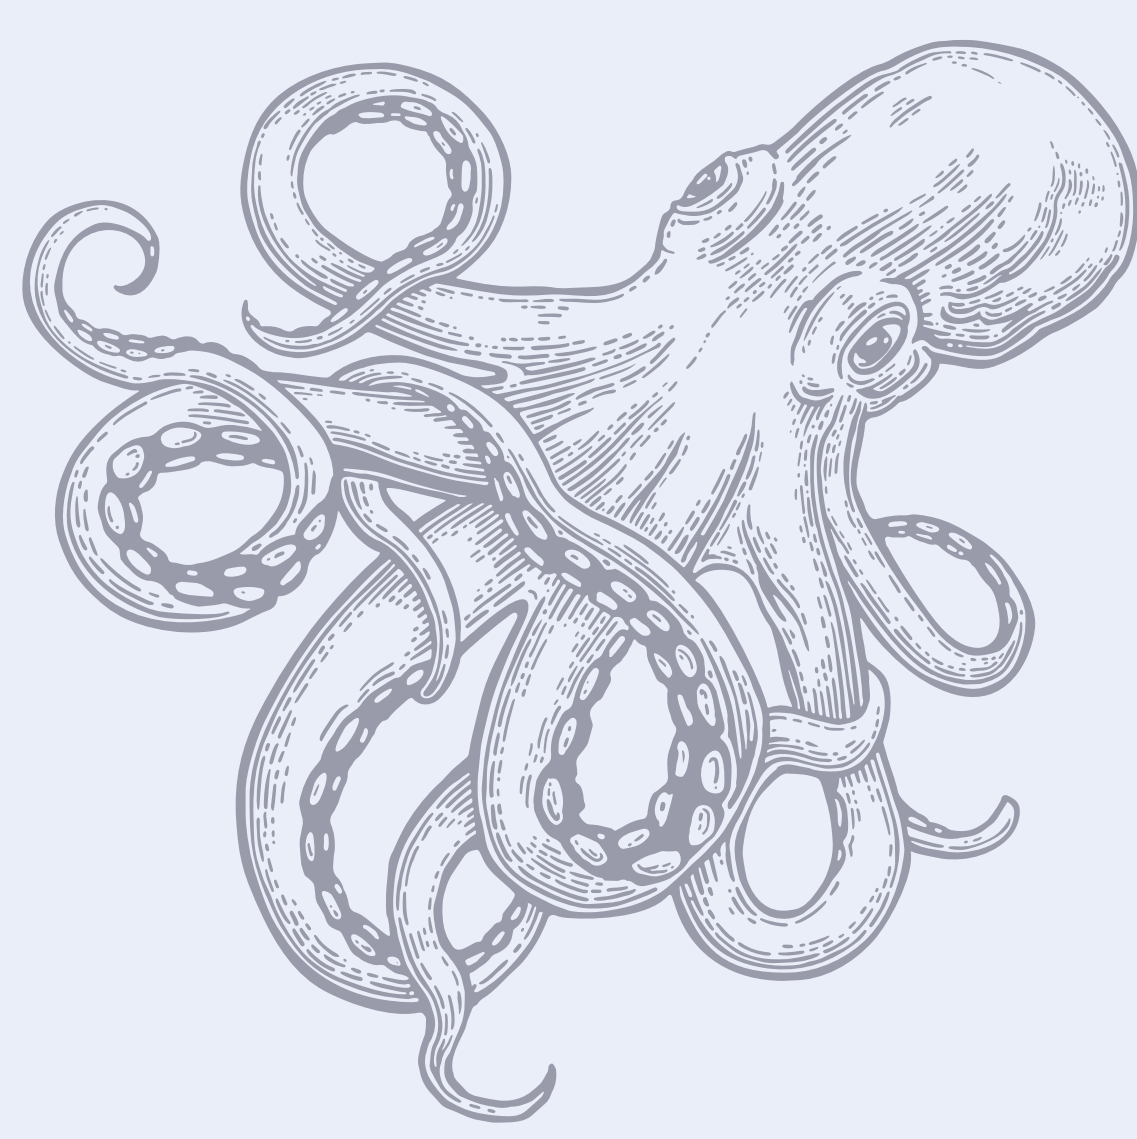

- Converged attack surface defense including IT, OT, Mobile, & Cloud.
- End-to-end services provide preparation for, prevention of, and protection against cyber threats.
- Open vendor ecosystem includes support of best of breed vendor solutions

#### Flexible Engagements

**Deep** - DeepSeas can serve as a component of your full detection & response capability

**Deeper** - DeepSeas can serve as the core of your detection & response capability.

**Deepest** - DeepSeas can provide your entire detection & response capability.

### Our Values

The DeepSeas values provide the ultimate guide for our daily behavior and decisions. In fact, our values are the answer to the question: How do we behave?

Without these values, we aren't DeepSeas. They preserve the essence of our organization, reflect the personalities of our Deeps, and enable us to exceed your expectations.

We are client obsessed.

We believe in the power of diversity.

We stand in solidarity with our teammates.

We solve hard problems at the speed of cyber.

We prioritize personal health and wellbeing.

# DeepSeas Solutions

As a customer of DeepSeas, you'll get the best of both worlds. You get the depth of a large cyber defense build, where the defense is tightly integrated with the business, and tradecraft with the cost efficiency and scale of an offsite as-a-service provider.

## DeepSeas Capabilities

The DeepSeas Prepare, Prevent, Protect solution portfolio can help today's CIOs, CISOs, CSOs, and IT leaders rightsize their security investment to meet the demands of their employees, constituents, customers, and board members.

### Prepare

Solutions to Prepare

### Prevent

Solutions to Prevent

### Protect

Solutions to Protect

## Prepare

### Virtual CISO

With the DeepSeas Virtual Chief Information Security Officer (vCISO) service you will partner DeepSeas with a strategic security advisor who can remove the burden and stress of leading and managing a security program by bringing expertise and knowledge to your business. The DeepSeas vCISO service comprises a standard security strategy program playbook, which begins with the development of a risk assessment and a security roadmap. Your key stakeholders can align budgets and strategic security initiatives to guide the security program and benefit from ongoing access to your part time virtual CISO.

### Incident Response Retainer

The DeepSeas IR retainer services are offered either on a pre-paid or post-paid basis. With a pre-paid IR retainer, you are guaranteed a response time of ≤12 hours for remote support or ≤24 hours for on-site support within the United States. Response times for international destinations will be mutually agreed upon. With a post-paid IR retainer, response times are on a best-efforts basis depending on the urgency of the request. You will also receive access to a 24×7 support watch center throughout your IR engagement.

### Professional Security Services

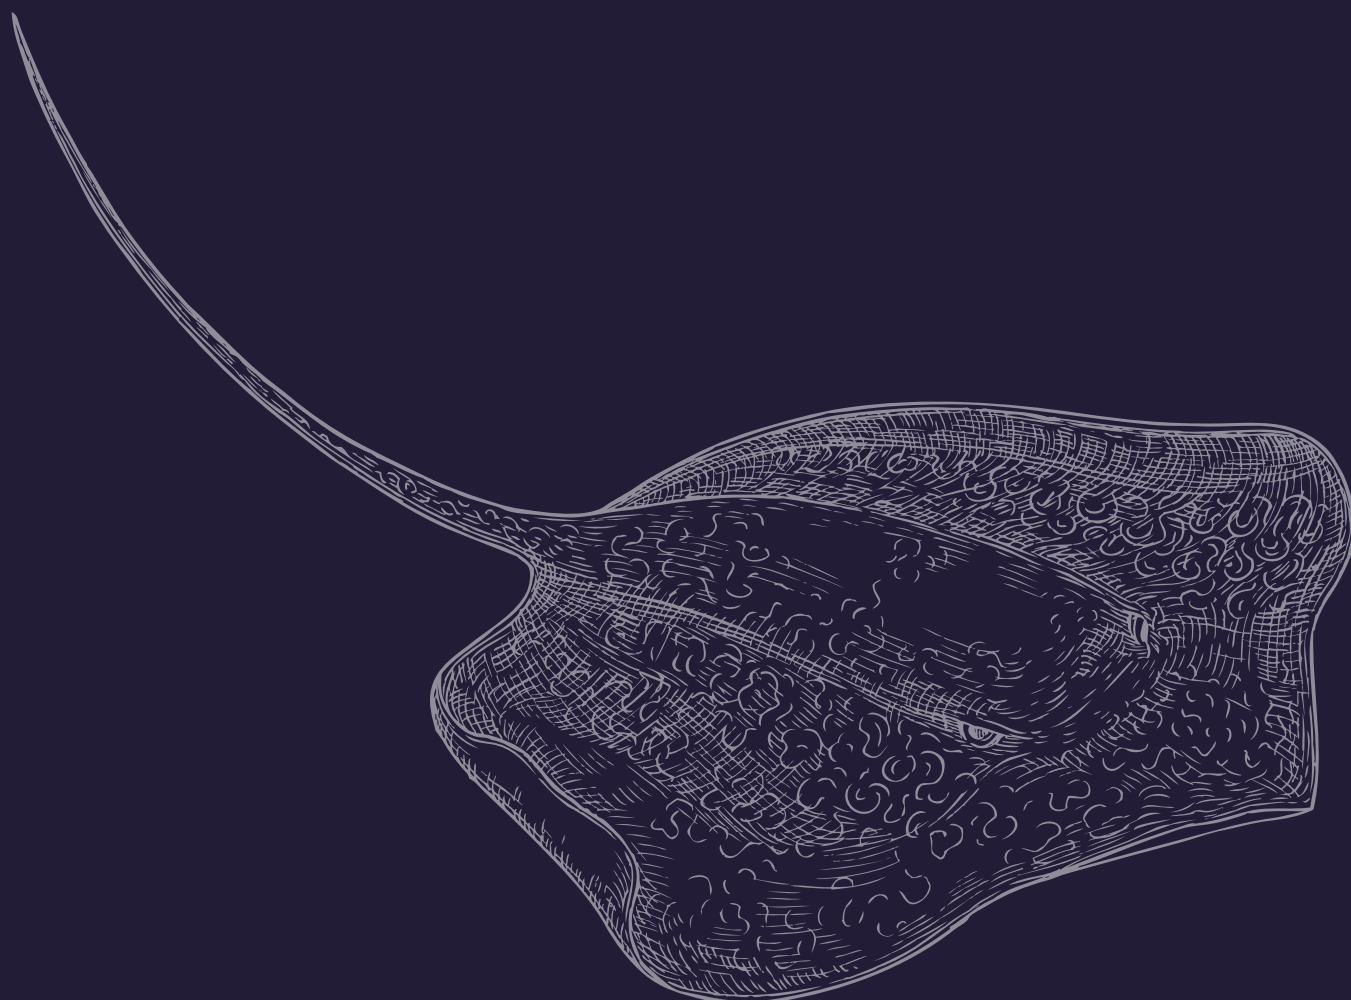

DeepSeas offers world-class cyber expertise to support a broad range of cyber consulting, tactical offensive and defensive testing, and/or will operate cross-functionally to support a MDR program.

### Security Tools Effectiveness Assessment

The DeepSeas Security Tools Effectiveness Assessment offers a comprehensive evaluation of your cyber defense controls against an extensive catalog of simulated attacks to reveal potential security weaknesses within your environment. Test results are then scored and mapped to the MITRE ATT&CK framework and compiled into detailed reports to inform strategic decision making and prioritization of future cyber initiatives.

### Compromise Assessment

The DeepSeas Compromise Assessment service seeks to identify evidence of an active or historical security breach in your IT systems by combining threat intelligence analysis, endpoint detection, and advanced threat hunting performed by an experienced team of DeepSeas cyber defense professionals.

## Expertise

Our deeply experienced teams respond to some of the most advanced cyber threats in both the public and private sectors. Bringing their experience and backgrounds from serving the U.S. intelligence community, Fortune 500 cyber defense teams, and world-class enterprise security consulting firms, our teams of experts are driven to make world-class cyber defense outcomes accessible to all organizations.

### Threat Intelligence Experts

DeepSeas cyber threat intelligence team members monitor threat actors, malware families, and offensive tactics used in the real world. Synthesized intelligence is sent to our threat detection engineers to ensure that signatures are developed and deployed to a variety of defensive systems. Our dark web monitoring teams look for incidents of client compromise and trends in criminal activity that may impact our clients.

### Executive Security Leaders

Our team of senior cyber security experts brings together a diverse range of background and expertise, with members having served in the U.S. military, for major consulting organizations, and in cyber security programs for some of the world's largest enterprises. Each member of our Executive Security Team brings a unique set of skills, knowledge, and a wealth of experience to the table. They are available to advise and support you through some of your most challenging cyber security problems. Their collective expertise and proven track record of success make DeepSeas the smart choice if you are looking to secure your digital assets and stay ahead of evolving cyber threats.

### Security Analysts

Our cyber defense analysts are a team of highly knowledgeable and experienced professionals. Their areas of expertise include advanced threat analysis, malware reverse engineering, advanced analytical research, and advanced adversary response. DeepSeas analysts maintain industry recognized GIAC certifications in areas that include Certified Incident Handling and Advanced Threat Defense. Our commitment to cyber defense excellence ensures that you receive the highest level of service and expertise.

### Service Delivery Crew

Your Service Delivery Crew members are assigned to each cybersecurity project and remain as your main point of contact throughout the duration of the service. From technical onboarding, project management, dispute resolution, to procuring resources as needed, your Service Delivery Crew will be your liaison for "all things" needed at DeepSeas in Professional Services.

### Technical Support Crew

The DeepSeas Professional Services includes a variety of engineers who are procured specifically to deploy and implement your solutions and will continue to provide you with ongoing support. Each crew member is a subject matter expert with critical cybersecurity capabilities that build and mature your security posture. They help you to prepare, prevent and protect. Their capabilities include proactive assessments, detection and analysis, security architecture, security engineering, incident response, advisory and compliance assessments, data science and reporting, and cyber threat intelligence.

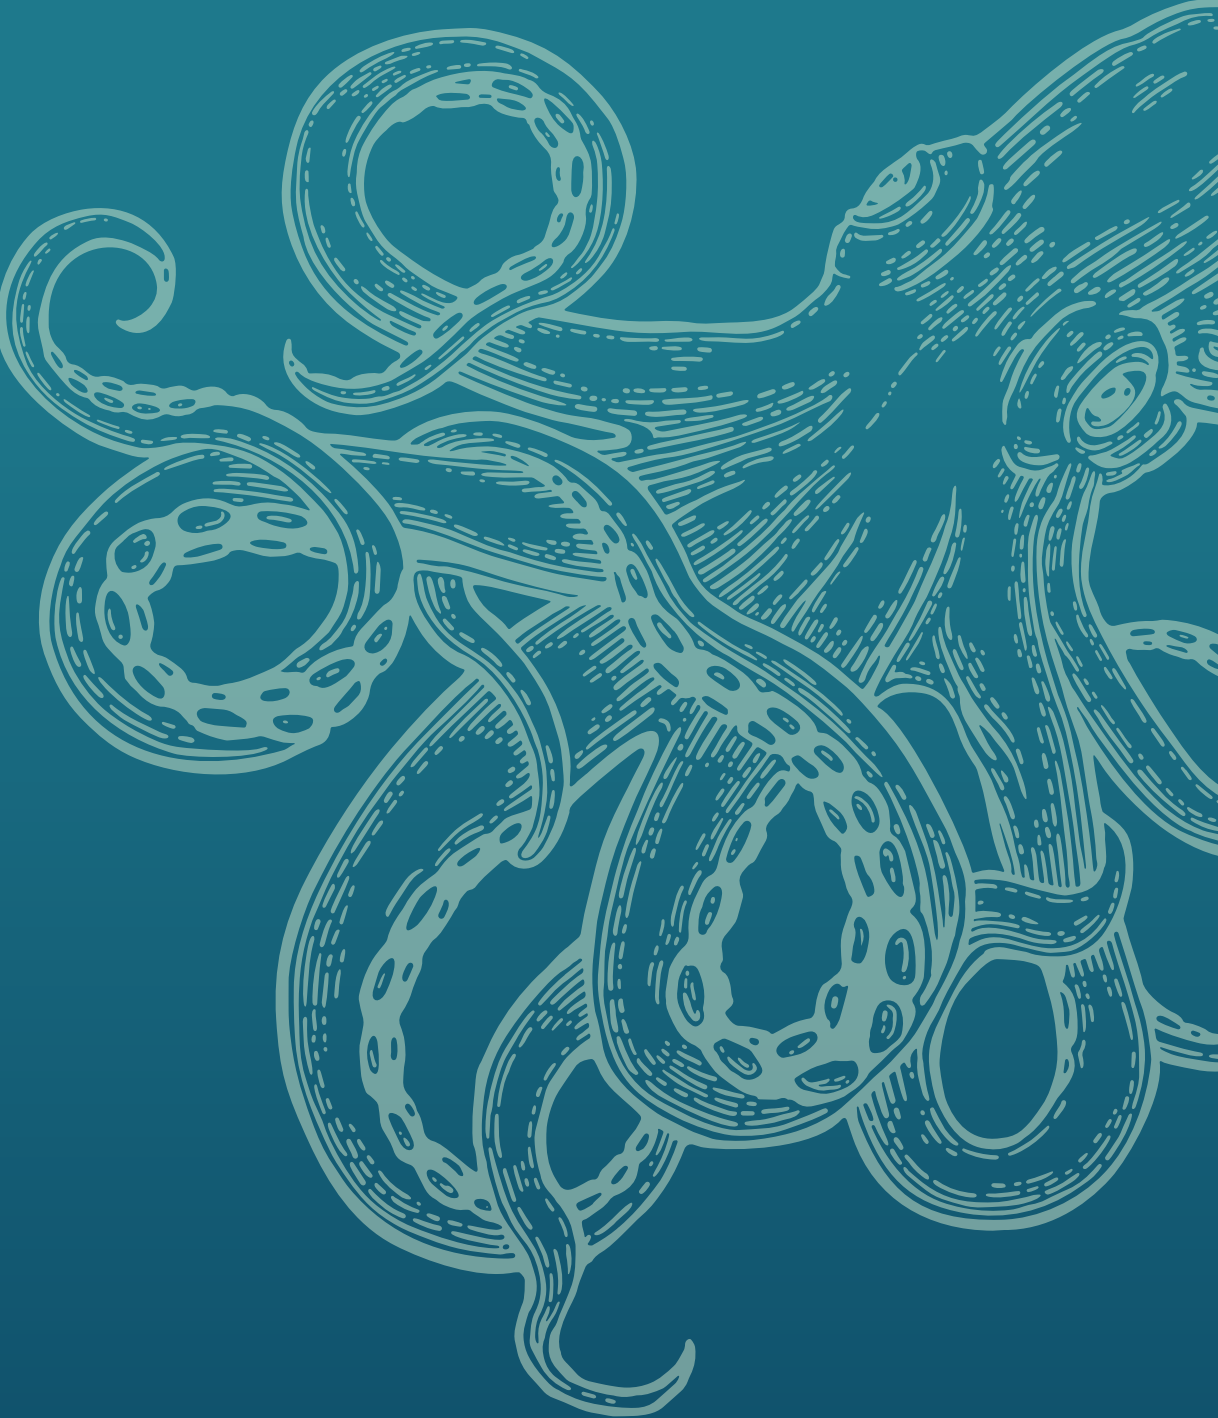

### Become an Expert at DeepSeas

Most everyone has their peeps, but at DeepSeas you'll have your Deepseas! Are you meant to be a member of the Deepseas crew? Ask yourself these questions.

- 1. Are you client-obsessed?
- 2. Do you believe in the power of diversity?
- 3. Do you stand in solidarity with your teammates?
- 4. Do you solve hard problems at the speed of cyber?
- 5. Do you prioritize your health and wellbeing?

If your answer is "YES! 100%" to these questions, your first step should be to follow DeepSeas on LinkedIn. Engage with our posts and reach out to our Deepseas. Get to know us and become part of the DeepSeas community.

With 3 decades of combined company experience, we've grown from a trusted analytics solution and MDR provider to the world's deepest spectrum of cyber defense services.

[Become A Partner](#)
[Partner Login](#)

## Why DeepSeas for MDR and Threat Analytics

### Deep Talent

**Deep Cyber Talent** - Cyber defense is all we do, and we are fully vested in protecting your business from cyber harm. We hire, develop, and deliver an unmatched team of cyber security experts. We defend our clients against the most hostile global adversaries 24x7x365.

### Deep Defense

**Innovative Cyber Defense Platform** - The DeepSeas platform works with and improves existing tool investments to Orchestrate and Automate Cyber Response

### Deep Analytics

**Patented ML Analytics to find Anomalies in Large Data Sets** - Cost effective log storage, reporting and search with unique behavioral & anomaly detection

## Why Partner with DeepSeas?

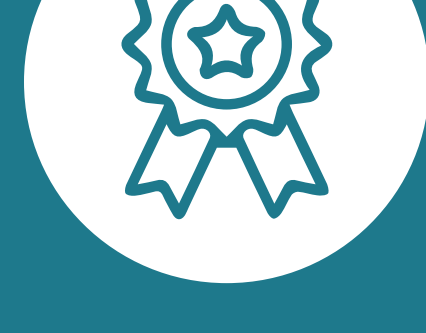

### We Are Partner Focused

As a fully dedicated, partner-focused company, DeepSeas is committed to building a long-term and profitable relationship together with you.

### Win More Deals

By partnering with DeepSeas, you'll be a provider of an award winning MDR+ offering, which will help you win new deals while exceeding client expectations with proven cyber defense tradecraft and tools.

### Accountability You Can Trust

DeepSeas will drive engagement together with you to create a mutual pipeline of opportunities while providing orchestrated cyber defense for your clients with deep accountability scaled through automation.

## How Do We Partner

### We Invest in our Partners

Our partner go-to-market approach is based on our commitment and ongoing investment into our relationship with your team. Everything from helping your team prospect & sell to training and assisting with delivering the recurring revenue contracts which earn the margin and dollars you deserve - it's all part of our commitment to the relationship.

### Access To Partner Resources

When you become a partner, you gain access to our best people and resources, including our DeepSeas Partner Portal, demos, case studies, and training with our DeepSeas team members who are dedicated to support your success.

### Our Sales Team Is Non-Competitive

Ever wonder if who you're partnering with is your competitor? As a partner-focused firm, we have systems and processes in place to ensure we are not competing against you.

## Who Partners with DeepSeas?

### Managed Service Providers

- Go-to-market quickly with innovative DeepSeas solutions to Prepare, Prevent, and Protect your clients most important infrastructure, applications, and data.
- Understand the need to meet your clients and prospects where they are in their cyber defense journey, building right-sized cyber defense solutions from our bundles and scalable and robust security solutions.
- Partner with DeepSeas to provide your clients with a mature, market-ready security platform that reduces the time to market, while minimizing capital investment, staffing labor, training & operations.
- Migrate away from a cyber provider that isn't meeting your needs to an outcome-driven relationship with DeepSeas.

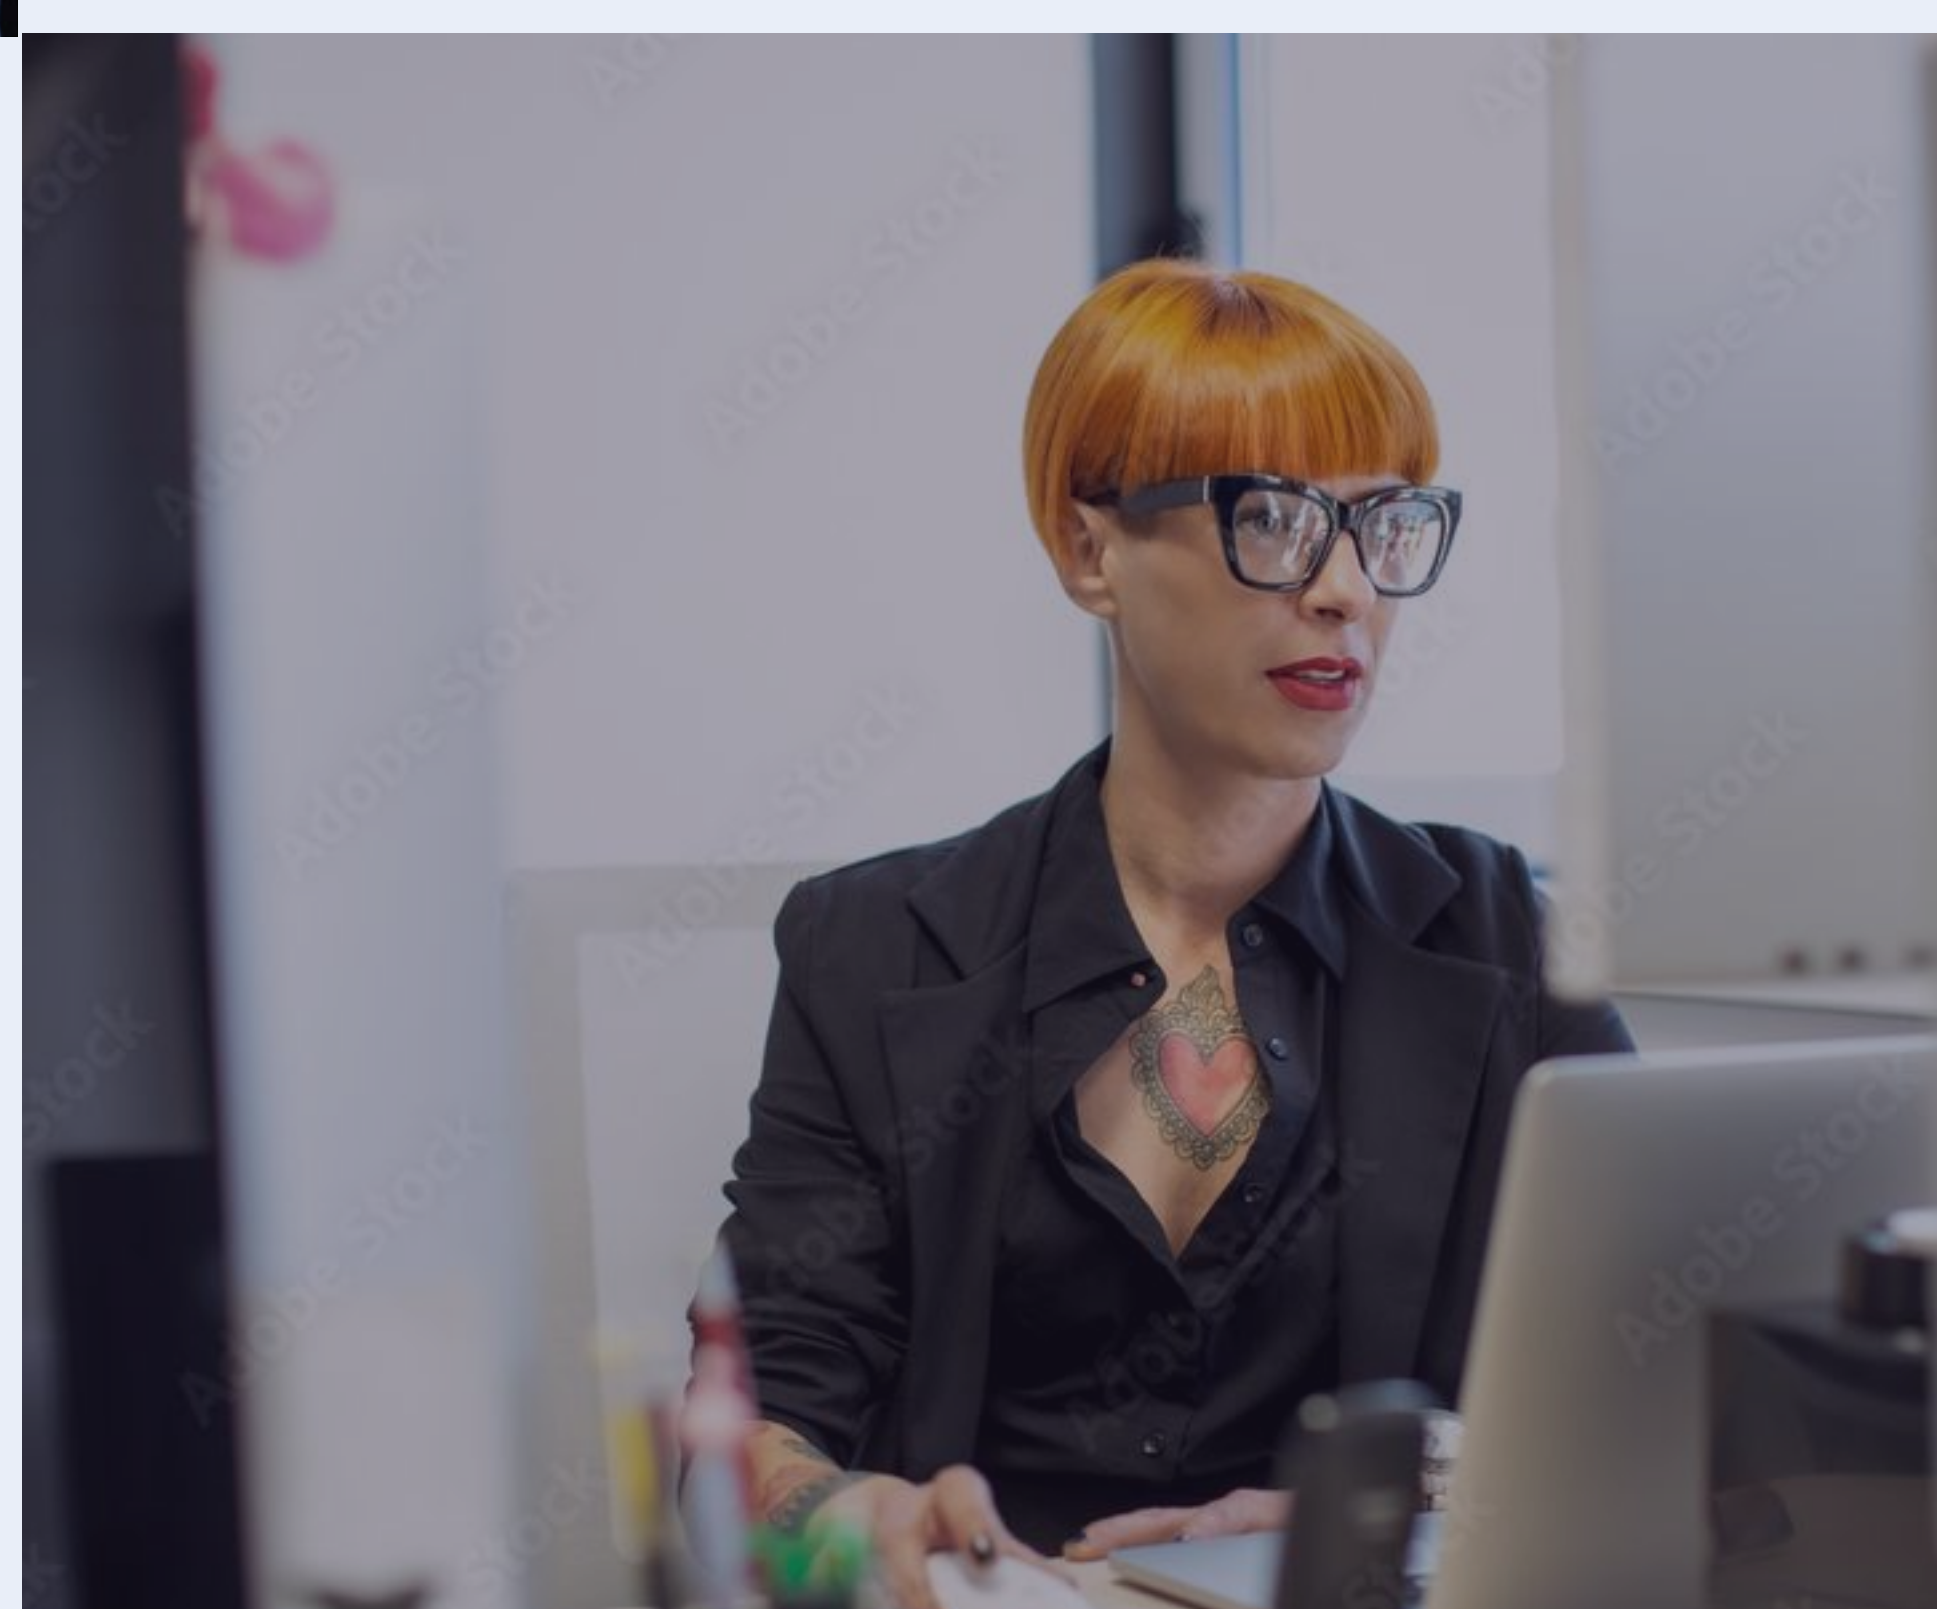

### System Integrators & IT Solution Providers

- When you partner with DeepSeas, there is no need to create a private label or productized offer if that does not fit your business model.
- Partners can choose to resell, refer, or build custom offerings around the DeepSeas services that best fit their needs.
- With 30 years of combined experience, the portfolio strategy team at DeepSeas can advise on market and solution positioning.

### IR Firms, Risk & Consulting Organizations

- DeepSeas offers partnership programs with organizations and firms that provide Incident Response, vCISO, risk management, advisory, and IT consulting services.
- If your organization has an IT security, risk consulting, or cyber advisory practice, DeepSeas can provide a quick-start, comprehensive cyber defense solution.
- DeepSeas will provide rapid Managed Endpoint Detection and Response deployment during an IR event, with the opportunity to extend the relationship with ongoing MDR+ services together as a proven winning model for IR Firms.

## What Our Partners Say

"DeepSeas gets what the channel is about. They didn't just do a hand-off and say, 'Here's the script, go.' They came prepared with market data, client targeted content, and training, and they figured out the best way to work within our sales organization."

**Jeff DiRado**  
Executive Vice President / TIG, Technology Integration Group

## Introducing the DeepSeas Partner Program

### Refer, Certified Resale, or Co-Sell - You Choose

Each partnership is designed to be a mutually beneficial relationship that enhances your internal offerings and solutions, while maximizing your span of influence within your clients' organizations. We understand that your customers see you as a trusted advisor and that your relationship with them is essential to your business and success.

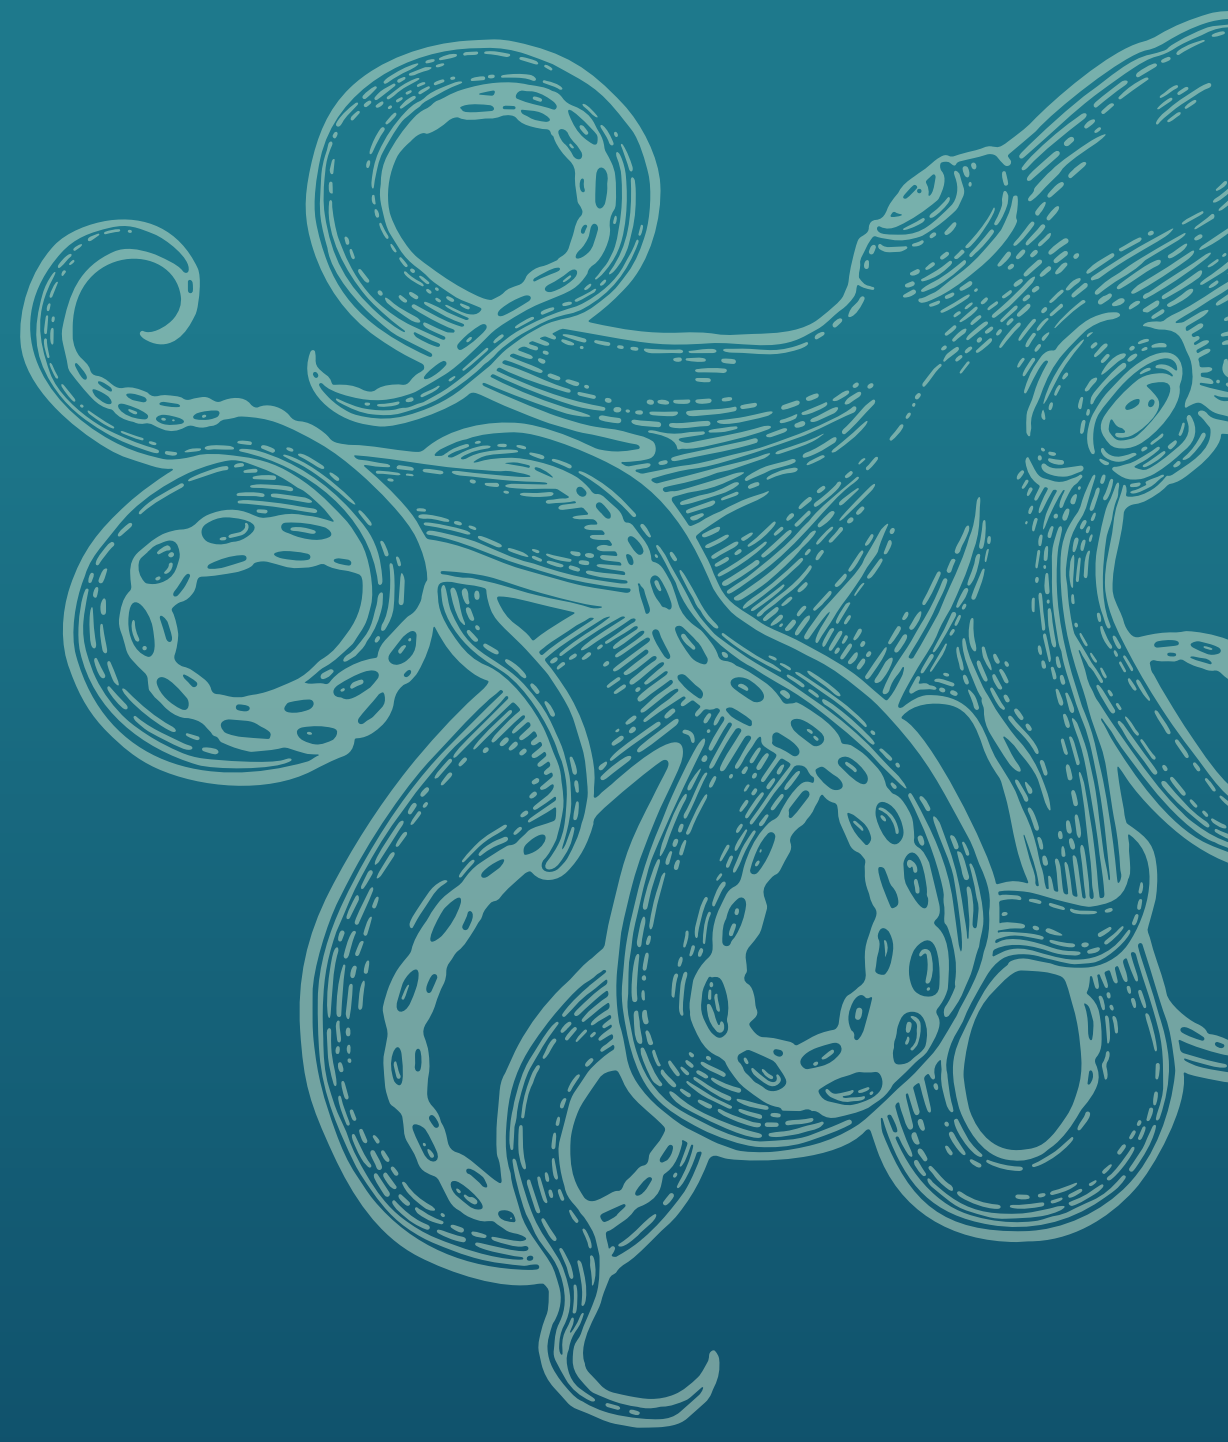

Find a partner model that works best for you based on your business model (referral, reseller or private label). Let us help you build your customized managed security offering by providing you with assistance in developing your solutions offer.

### Our partnership model will provide more business

We have above industry average win rates with our co-selling model with flexible Solutions to meet your clients' budgets without sacrificing cyber defense.

### We are non-competitive

Our clients and your services come first. We are here to provide our solutions where they are needed.

### Unlimited Sales Support

We provide you with the resources you need to win each deal. We provide continual training on offering updates, competitive differentiators, and deep solution knowledge that will prepare your team to compete and win business together.

### Unparalleled Marketing

Our DeepSeas marketing team can share powerful content and organize joint digital events that your team can distribute in your marketing channels and share in your networks to drive engagement.

Security Operations Expert: Meet Dorian James, DeepSeas

February 14, 2023

In this new issue of the series “Meet Our Deeps,” we introduce you to a DeepSeas cyber security operations expert, Dorian James, who is serving in the cyber seas. Let’s dive in to learn more about Dorian’s work and career.

**Q: Hi Dorian. What is your current role at DeepSeas, and what do you love about your work as a cyber security operations expert?**

A: As a Senior Manager of Security Operations at DeepSeas, what I enjoy the most about my work is my team. The teams at DeepSeas SOC’s (Security Operations Centers) are great! Our teamwork, willingness to help others, diligence, and get-it-done attitude all work together and make a huge impact on our clients. Our team’s approach allows us to be productive and protect our clients with confidence.

**Q: Will you please share a bit about your career journey? Any major milestones you are proud of or particular hurdles you overcame?**

A: As a retired Marine (2014), the major milestone that I overcame was the transition to the private sector. The organization that joined DeepSeas gave me the opportunity to start a new career during a stressful time in my life. Any time a Vet transitions and begins a new career can be stressful — I served for 20 years, so it was a big move for me. Serving in security operations allowed me to grow into the role. I started at the bottom and grew into a cyber security operations expert, where I am today with DeepSeas. I am proud of my team, what we have built, and what we do every day for clients.

*We’re fortunate to have Dorian as a member of our Deeps crew and thank him for sharing a bit about himself and his areas of expertise. Come back to meet more of our DeepSeas cyber security operations experts in future issues of our “Meet Our Deeps” series.*

## How We Work

View The DeepSeas Process

### Increase ROI on existing security technology investments

The DeepSeas Cyber Defense Platform integrates with leading enterprise security tools to allow your cyber defense team to harden your defenses, identify threats, and take the remediation actions.

Maximize Improve

#### The DeepSeas Cyber Defense Platform Makes Your Existing Security Tools Better.

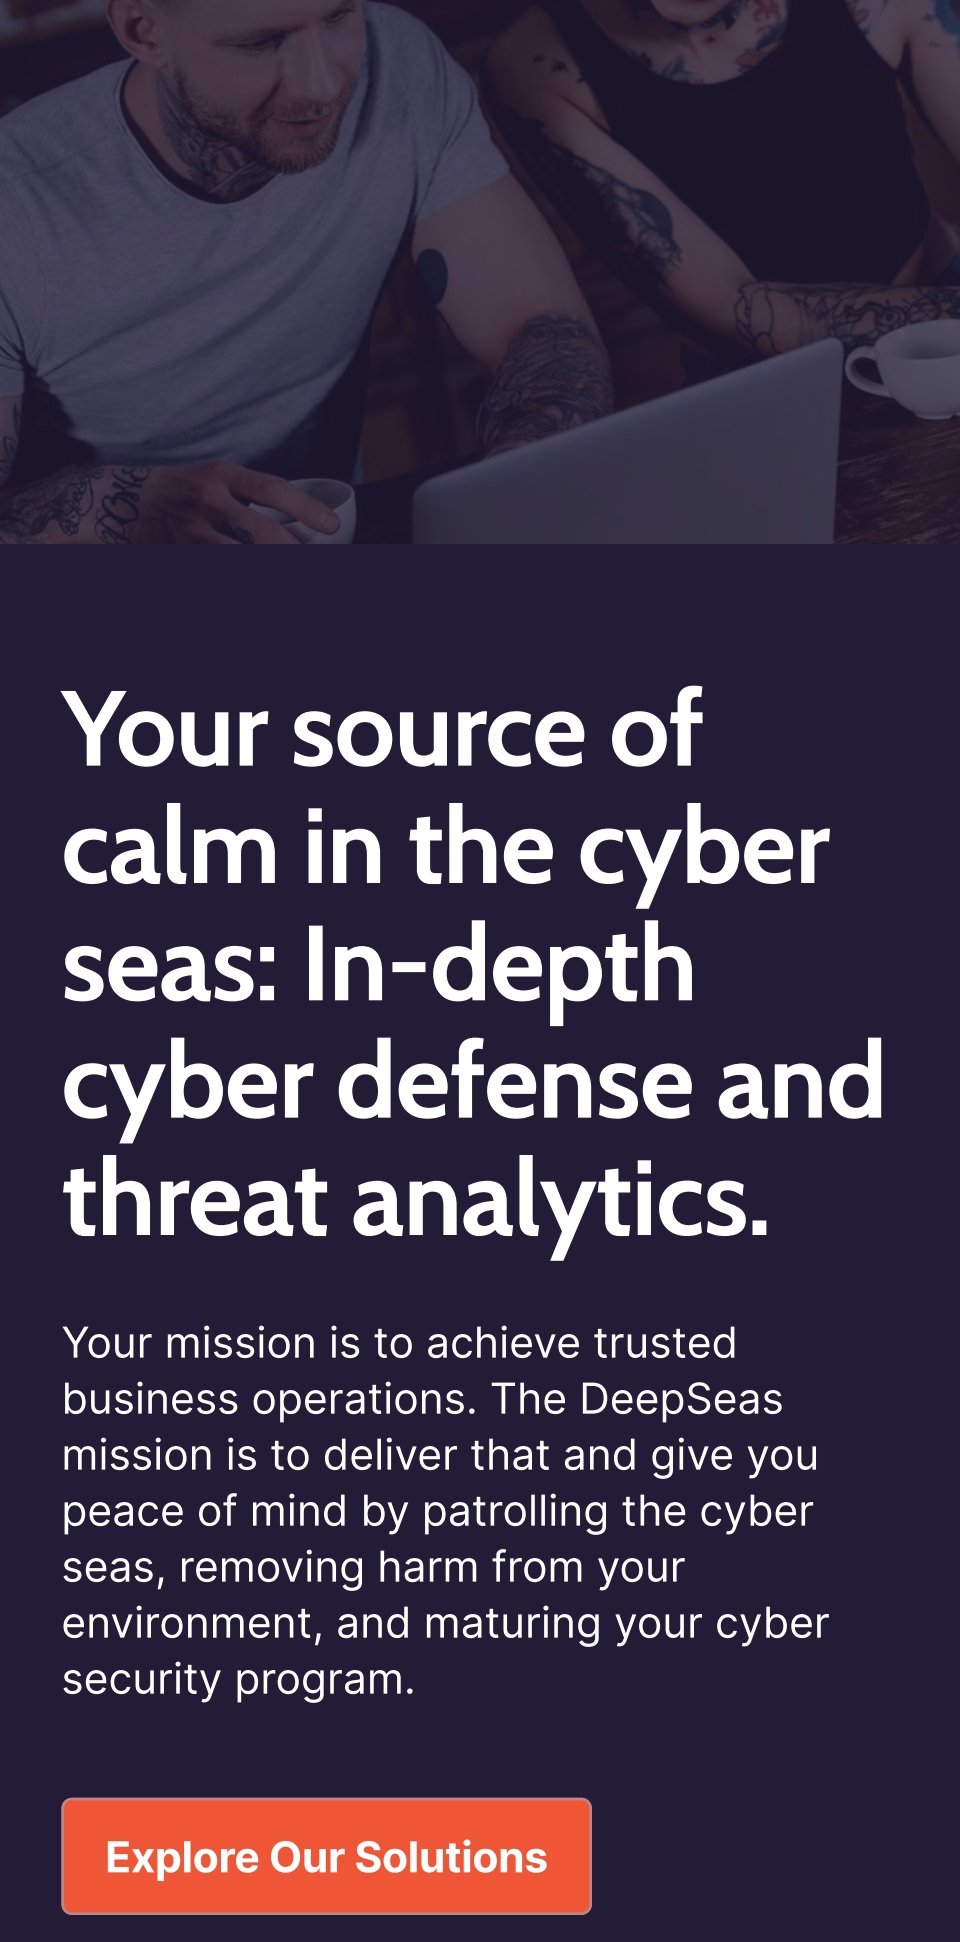

Our Open XDR strategy allows you to maximize the impact of your existing security tech.

The DeepSeas Cyber Defense Platform unlocks extended detection and response (XDR) use cases, utilizing security technologies you may already have. Rather than asking you to replace security tools you have previously made procurement and deployment investments in, we directly integrate with your existing security tools and help you configure them for maximum environment visibility and threat detection impact.

We understand that your security needs are unique, so we meet you where you are on the cyber maturity voyage and help you forge ahead. Our customer portal can provide you with a turn-key cyber defense command center to help you track threat defense workflows and program metrics, as well as directly interact with our team. Alternatively, our platform API framework enables flexible integration with security service management tools you already use today.

## Why Trust DeepSeas

**You'll get real cyber experts that live to remove harm from the cyber seas.**

Cyber defense is all we do, and we are fully vested in protecting your business from cyber harm. We hire, develop, and deliver an unmatched team of cyber security experts. We defend our clients against the most hostile global adversaries 24x7x365.

**Your peers trust us to protect them against the most sophisticated adversaries in the world.**

Our clients are your peers, and while you may face similar cyber criminals, you likely have nuanced operational challenges. We'll meet you where you are and configure our offerings to your organization's specific needs as you journey toward trusted business operations

**It took decades to build an implementation methodology that you'll love, and it was worth it.**

Ultra by DeepSeas is our unique service delivery methodology that enables cyber defense solutions to be personal, reliable, transparent, and cost effective. It has been built through decades of experience in driving complex managed cybersecurity programs across multiple industries. The Ultra methodology emphasizes high-value outcomes that address your key areas of cyber risk.

**You'll enjoy the benefits of a deep partnership ecosystem that is built on long-term relationships.**

We partner with innovators to provide you with access to leading capabilities through a single trusted partner. Proven capabilities matched with our trusted partner relationships will deepen and mature your security program. As a fully dedicated, partner-focused company, DeepSeas is committed to building long-term and valuable partnerships that are customizable.

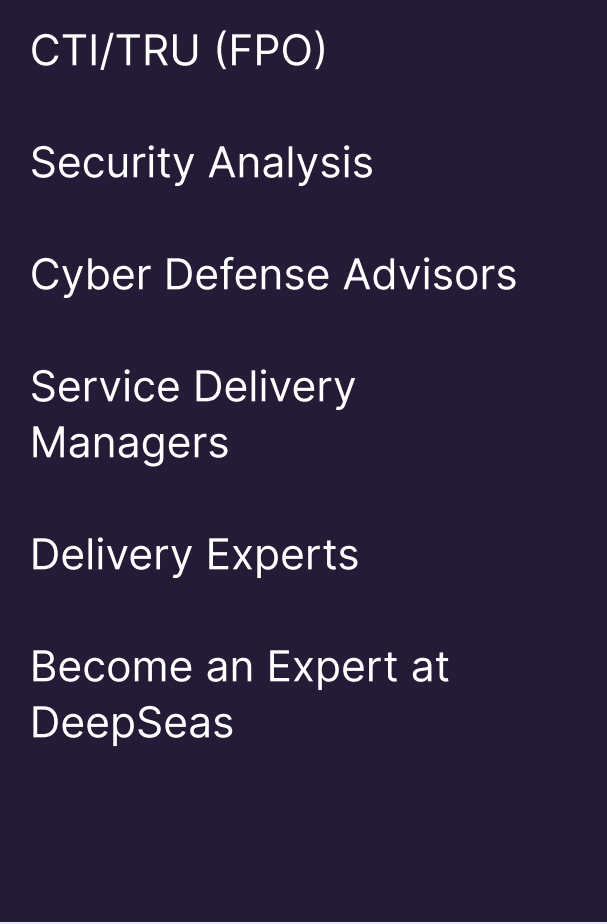

## Security Analyst quote

When we brought in DeepSeas to maintain and run our security operations center, they came with a very deep background, not only technical but operational as well. DeepSeas is able to bring in a high caliber of people, systems engineering, and solutions to help us be successful.

**Dr. Tina Briney, Director SOC, IR, IT Security & Data Privacy**

## In-Depth Managed Detection & Response is Within Your Reach

**Are security visibility gaps creating unacceptable risk?**

Achieve full view of deep threats with broad attack surface coverage.

**Are incomplete and manual security procedures increasing attacker dwell times?**

Minimize business impact risks through fast and complete threat response.

**Are your limited security team members overworked and stressed?**

Overcome staffing challenges with 24/7 access to a deep force of cyber talent.

**Are sub-optimized security tools limiting your cyber defense capabilities?**

Optimize existing security investments through the DeepSeas cyber defense platform.
