Respiratory apparatus

Ensure adequate continuous ventilation to prevent excessive vapour accumulation and ensure compliance with occupational exposure limits. If appropriate and depending on one's own methods and extent of use, the following technical control measures may be required as additional protective measures (a) isolation of mixing bays and other areas where material is used or handled freely; maintaining these areas at a lower air pressure than the rest of the plant; (b) use of personal protective equipment, such as a suitably equipped and approved respirator with organic vapour cartridge or filter cartridges and dust filters; (c) use of a local exhaust ventilation system around open tanks and other open sources of potential exposure, to prevent excessive inhalation of the product, including places where material is freely weighed or measured; use of a dilution ventilation system of the work area, to eliminate or reduce possible exposure of personnel; (d) use of closed systems for material transfer and processing.
