# Global Citizens Innovative Solutions SDGs Challenge -  Submissions --  Jury Assessment Rubric

| | Marks awarded out of 100 points | Attaining the goal by 2030, overall idea *(10% weight)* | Implementation Including stages and timeline *(10% weight)* | Realistic elements toward implementation *(10% weight)* | Level of human and other resource requirements *(10% weight)* | Sustainability of idea/solution *(10% weight)* | How realistic are expected outcomes/ success criteira *(10% weight)* | Potential risks and challenges *(10% weight)* | Presentation quality *(10% weight)* | Presentation originality of format *(10% weight)* | Level of benefit to society toward reaching the selected SDG if solution is implemented *(10% weight)* | TOTAL 100% |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A very clear and detailed rationale for choosing the initial idea | 9 to 10 | A highly original idea with a clear understanding of the issues involved and a very clear and detailed rationale for choosing the  initial idea. Alternatively an exisiting idea that has been further developed to take it to the next level | Very clearly and thoroughly developed stages of how to implement the idea and a detailed, realistic timeline of how the idea will be implemented . | Realistic and viable consideration has been given to how the idea would be effectively and economically funded. | There is well detailed and informed consideration of the personnel and or resources required to successfully implement and operate the idea | The proposal shows clear evidence of being, practical, viable and with longevity that would be sustainable in the long term future | Clear evidence, supported with data that shows how the idea will be successful in contributing to solving the SDG chosen | Evidence of the risks or challenges that could occur to the implementation of the proposal. | Outstanding levels of clarity and organisation with data and evidence to suport all aspects of the proposal. It shows clear evidence of passion and collaboration amongst the team members and was highly engaging to experience. | The presentation format was highly original, further supporting the evident passion and engaging quality of the proposal with an obvious understanding of where to go next. | This proposal really resonated with me because of its realistic universal application and ability to provide realistic significant benefits to large numbers of the world's population with little or no negative impact upon the environment | |
| A clear and detailed rationale for choosing the initial idea | 6 to 8 | An original idea showing understanding of the issues involved. Alternatively an exisiting idea that has been very well further developed to take it to the next level | Clearly and well developed stages of how to implement the idea and a detailed, realistic timeline of how the idea will be implemented | Fairly realistic and viable consideration has been given to how the idea would be effectively and economically funded | Detailed and informed consideration of the personnel and or resources required to successfully implement and operate the idea | The proposal shows evidence of being, practical, viable and with longevity that would be sustainable in the medium and or long term future | Fairly clear evidence, supported with some data that shows how the idea will be successful in contributing to the success of the Goal | Some detail and evidenced awareness of the risks or challenges that could occur to the implementation the proposal | Very good levels of clarity and organisation with data and evidence to suport most aspects of the proposal. It shows evidence of passion and collaboration amongst the team members and was engaging to experience | The presentation format was engaging, with good understanding of where to go next. | This proposal was interesting because and provided realistic benefits to a good number  of the world's population with little or no negative impact upon the environment | |
| A fairly clear and detailed rationale for choosing the initial idea | 4 to 5 | An original idea showing some understanding of the issues involved. Alternatively an exisiting idea that has been further developed to take it to the next level | Shows stages of how to implement the idea and some details of a possible timeline of how the idea will be implemented | Some realistic and viable consideration has been given to how the idea would be effectively and economically funded | Some detail and consideration of the personnel and or resources required to successfully implement and operate the idea | The proposal shows some evidence of being either practical or viable and with some longevity that would be sustainable in the medium and or long term future | Some evidence, supported with limited data that shows how the idea will be successful in contributing to the success in reaching the goal | Limited awareness of the risks or challenges that could occur to the implementation of the proposal | Satisfactory clarity and organisation with data and evidence to support several aspects of the proposal. It shows some evidence of passion and collaboration amongst the team members and was fairly engaging to experience | The presentation format was quite original, supporting the passion and engaging quality of the proposal with some understanding of where to go next | This proposal resonated with me somewhat. It has some realistic elements of real universal application and the ability to provide some real benefits to large numbers of the world's population with some negative impact upon the environment | |

| | | Attaining the goal by 2030, overall idea | Implementation Including stages and timeline | Realistic elements toward implementation | Level of human and other resource requirements | Sustainability of idea/solution | How realistic are expected outcomes/ success criteira | Potential risks and challenges | Presentation quality | Presentation originality of format | Level of benefit to society toward reaching the selected SDG if solution is implemented | TOTAL 100% |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A fairly clear with some rationale for choosing the initial idea | 2 to 3 | An idea showing some understanding of the issues involved and has been developed to take it to the next level | Shows some stages of how to implement the idea and a few details of a possible timeline of how the idea will be implemented | Little realistic or viable consideration has been given to how the idea would be effectively and economically funded | Little detail or consideration of the personnel and or resources required to implement and operate the idea | The proposal shows little evidence of being either practical or viable and with some longevity that would be sustainable in the medium and or long term future | Limited evidence, supported with very limited data that shows how the idea will be successful in contributing to the success of the SDG goal | Limited awareness of the risks or challenges that could occur to the implementation of the proposal | Some clarity and organisation with limited data and evidence to support a few aspects of the proposal. It shows limited evidence of passion or collaboration amongst the team members and was engaging at times | The presentation format was quite original, supporting the passion and engaging quality of the proposal with some understanding of where to go next. | This proposal resonated with me somewhat. It has some realistic elements of real universal application and the ability to provide some real benefits to large numbers of the world's population with some negative impact upon the environment | |
| A basic idea with limited rationale for choosing the initial idea | 0 to 1 | An idea showing limited understanding of the issues involved with little developement to take it to the next level | Shows few stages of how to implement the idea and veryfew details of a possible timeline or how the idea will be implemented | No realistic or viable consideration has been given to how the idea would be effectively and economically funded | No detail or consideration of the personnel and or resources required to implement and operate the idea | The proposal shows no evidence of being either practical or viable or have some longevity that would be sustainable in the medium and or long term future | No real evidence, supported with very limited data that shows little about how the idea will be successful in contributing to the success of the Goal | Very little or no awareness of the risks or challenges that could occur to the implementation of the proposal | Limited clarity or organisation with very little data or evidence to support any aspects of the proposal. It shows no real evidence of passion or collaboration amongst the team members and was rarely engaging | The presentation format was not very original, with little show of passion or the engaging quality of the proposal and little understanding of where to go next | This proposal did not really resonate with me It has few realistic elements of real universal application or the ability to provide real benefits to large numbers of the world's population without some negative impact upon the environment | |
