I accept the 2025 amendments to the FAWs RC Club Bylaws

Number of responses: 64

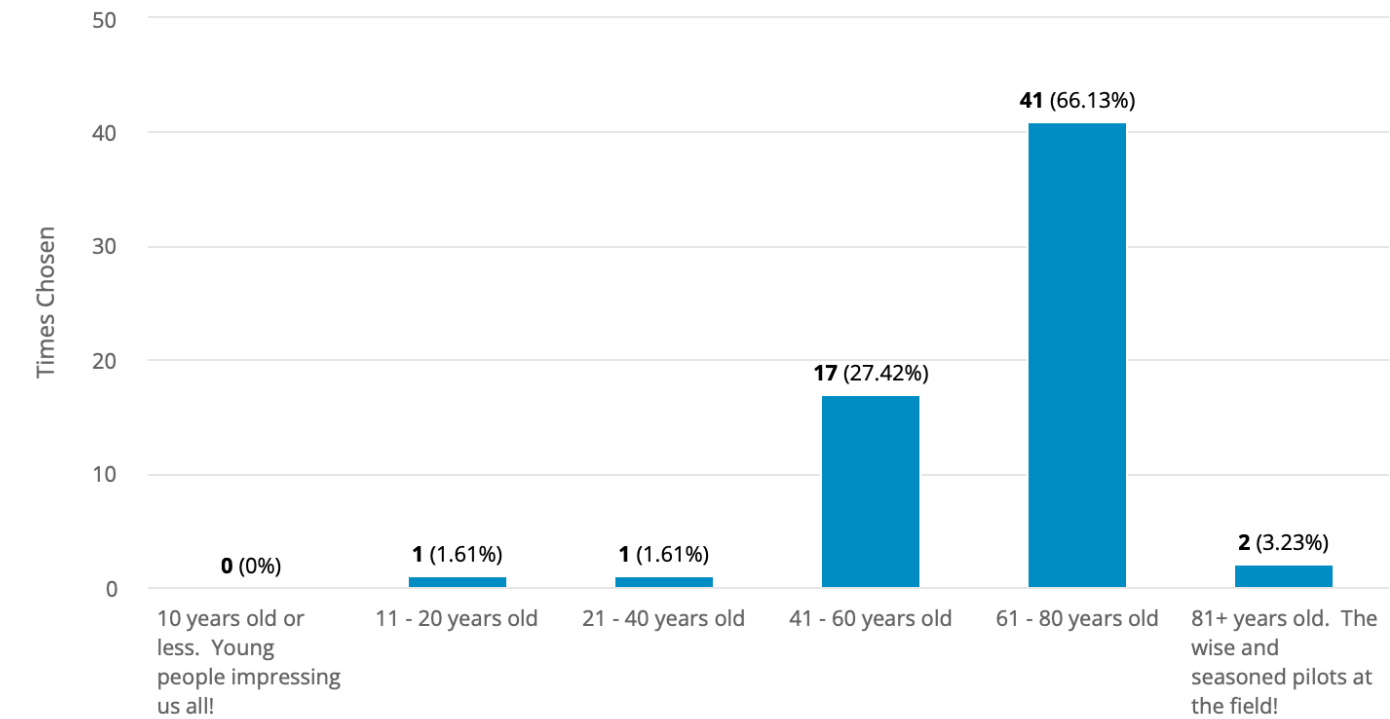

How many years have you been a Fly-A-Ways RC Club Member?

Number of responses: 64

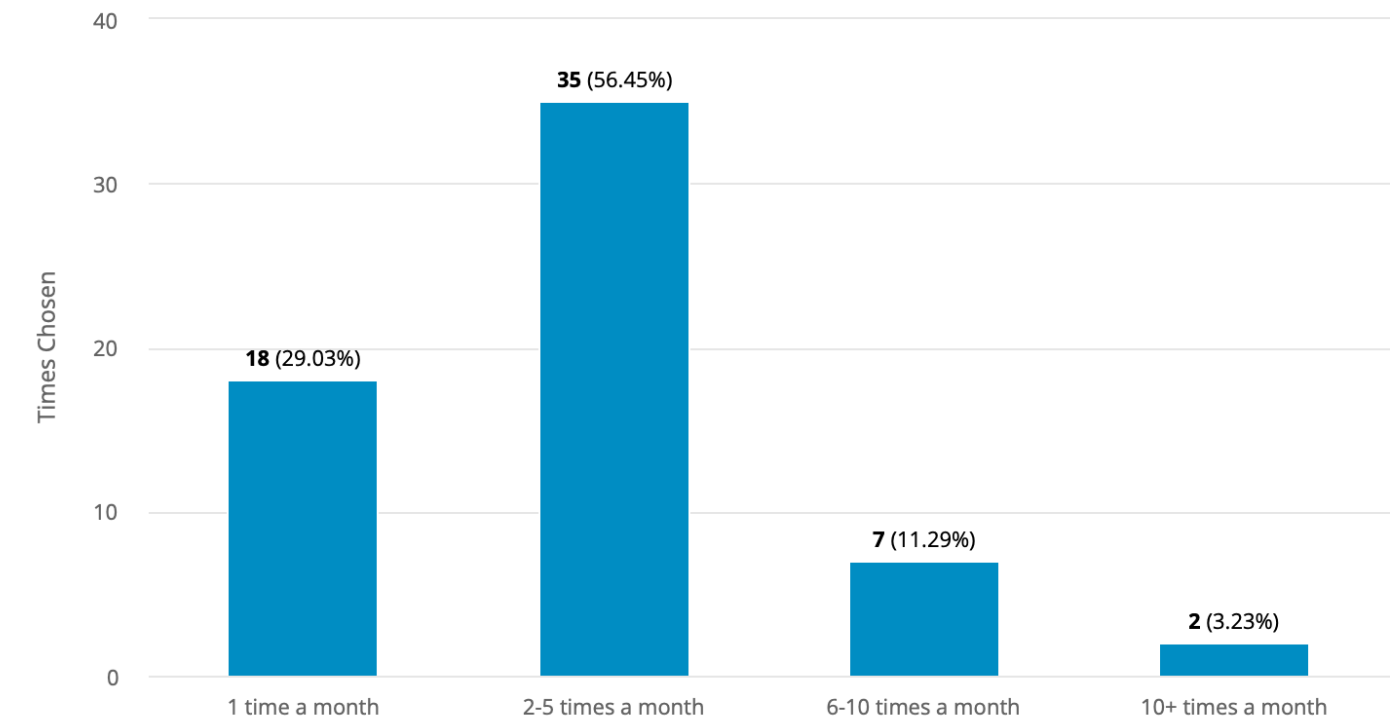

What age bracket are you?

Number of responses: 62

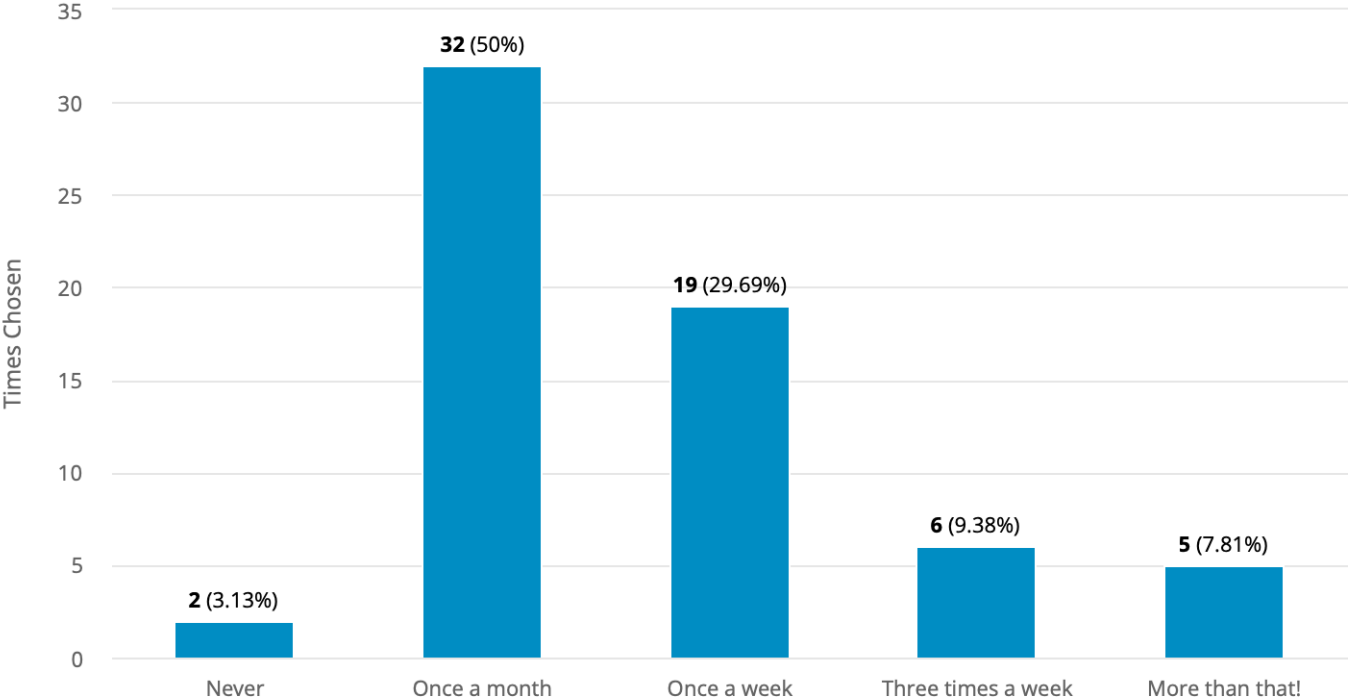

During the busy flying season (March-Sept), how often do you use the RC field?

Number of responses: 62

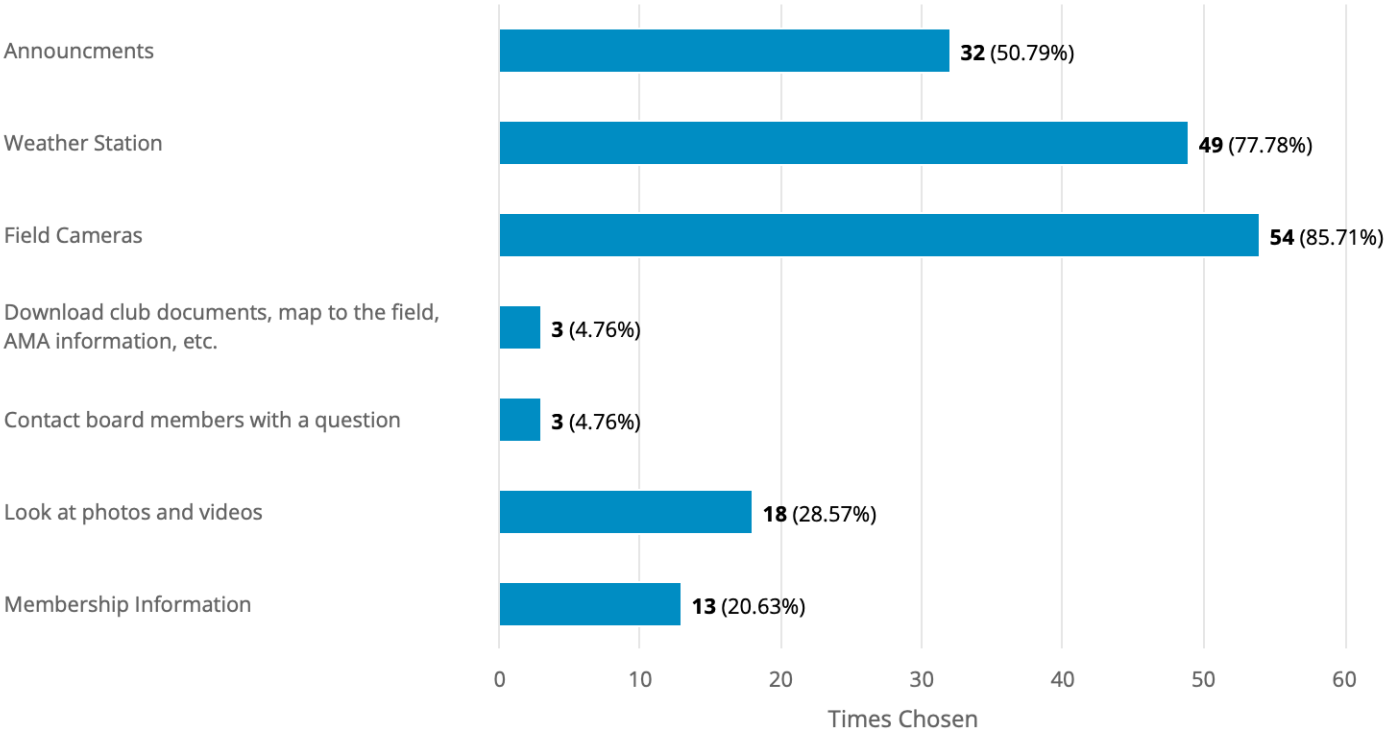

How often do you review the web site for announcements, field weather conditions, camera links, etc.

Number of responses: 64

Which of the following do you use the most on the website?

Number of responses: 63

What do you appreciate most about Fly-A-Ways RC Club in general? Is there something about our club that you feel could use improvement or a change? Do you have any specific comments for the club leadership team?

Number of responses: 32

Text answers:

Very good leadership.

Good people well managed field

The "pilot stations" don't provide the best protection for both the pilots and the airplanes when they ground loop.

The field, runway condition, open space to fly

I understand that safety is the most important aspect of what we do, but certain club officers need to work on their delivery at the field. On a recent visit someone was aggressively called out for not announcing their landing, when they very clearly did. The club officer wasn't even standing near the flight line at the time. People are jumped to put up a card when they are barely out of their vehicle. It's a great field with competent pilots. Let's not lose sight of the big picture.

I love that the club is very professional and the website is set up very well. I'm new to this club but communication and web based sign up and information etc are much better than any of the clubs I've participated in the past. 10/10!

It's a new experience to me. No complaints, other than weather!

The best flying field in Oregon.

Great people. Nice field.

I mostly enjoy the great people.... Wish I lived closer so I could be there more often

Or at this time

Club leadership has been top notch. Love the people of Fly-a-ways they promount friendship and the art of flying RC aircraft. My two cents.

Close to my house so easy to get out of the weather station and cameras show good conditions

Nice job!

The field is awesome, and I appreciate the expanded parking lot.

Great people and focus on making the hobby enjoyable for everyone

It's a great location to fly. We should have more fun flys and club events

I appreciate the friendly miss of everyone I've dealt with at the club. The location, the quality and improvements to the site.. very happy with the clubs operation and the leadership team. Thank you for all of your time and effort in governing the club.

I think the club has all the benefits of a well rounded RC hobby club.

Great place to fly, club is active with events, friendly members

NO

Every one is doing a great job ! The field always looks good !

Great club and organization!

I appreciate the service of our board members and the guys who maintain the field!

No comments today.

Club has progressed in the 30 years I have been a member, my third club flying site. Club is run very well and maintained very well. Thanks to all members that donate their time so we have a park like settingg

Love it the way it is

Fly-A-Ways is a really nice RC club, they have a long runway plenty of space for setting up your aircraft. Everyone at the club is always friendly and are always willing to help you out. The cameras and weather station are also very nice for people who live far away.

Awesome runway, camaraderie, social component

Instructors for setting up transmitters on both SAFE and Non SAFE set ups. how to set up Ratio's and mixing.

After a 15 year break from flying, everyone I have met at the field has been friendly and helpful for a returning "newbie"

Great Club. Great Field. Great Board of Directors!
