

HR Support Assistant

A personal HR assistant for every employee in your company: Our AI-powered assistant explains your HR policies and procedures in simple terms and instantly forwards requests to the relevant departments. It allows you to manage all HR processes from a single platform—as easily as having a conversation.

Capabilities

Real-Time Q&A Assistant

Answers all your HR-related questions—ranging from frequently asked topics to special cases—instantly and 24/7 using a company-specific knowledge base.

Form and Request Management

Easily create and manage all HR forms and requests from a single platform—just like having a conversation. The assistant identifies the appropriate form based on your request and guides you through the entire process.

Doc. and Info. Management

Access all your HR-related inf.—such as payroll records, personnel docs, training certificates, and benefit details—with a single click. The system intelligently categorizes historical data and brings it to you instantly.

Process Tracking Assistant

Track the status of your apps through real-time notifications and know in advance when each process will be completed. With personalized calendar integration, you'll never miss an important HR date again.

Why HR Assistant?

Operational Efficiency:

Automates routine HR requests to boost departmental productivity.

Compliance and Risk Management:

Reduces error rates in HR processes by up to 90%, minimizing legal compliance risks.

Cost Optimization:

Lowers operational HR costs, delivering direct savings.

Employee Satisfaction:

Increases trust in HR through instant responses and easy access to information.
