VI Peel - Advanced + 20 units of Xeomin (Botulism Toxin)

How it works:

- **Peel Component:** A chemical peel exfoliates the outer layer of dead skin, revealing brighter, smoother skin underneath and improving texture, dark spots, and fine lines.
- **Tox Component:** A neurotoxin injection (like Botox) relaxes facial muscles that cause dynamic wrinkles (e.g., forehead lines, crow's feet), preventing new lines and softening existing ones.
- **Synergy:** The peel prepares the skin for deeper penetration of active ingredients, while the neurotoxin smooths expression lines, leading to a more comprehensive rejuvenation.

What it treats:

- Dull complexion and uneven skin tone
- Fine AND deep lines and wrinkles (both static and dynamic)
- Dark spots and sun damage
- Poor skin texture and clogged pores
- Boosts collagen and improves skin elasticity

We are using the Advanced Peel, which is for Advanced Age - A VI Peel is a medium chemical peel (deeper than the original VI Peel). It target deep wrinkles, loss of elasticity, and collagen stimulation. While the Original is for general maintenance, the Advanced offers 25% stronger, targeted anti-aging results. Safe for neck and decollete. Not for pregnant or nursing women. Do not use retinoids a week before and plan to stay out of the sun until skin isn't peeling (usually starts around day 3 and ends around day 7).

Help our small business grow! Leave Us a Google Review

Your experience matters — and your review truly makes a difference.

Your review helps us:

- ♥ Keep and grow great providers
-  Expand clinic days, hours, and scheduling access
-  Reinvest in better technology, services, and pricing
-  Confidently add new treatments and offerings
-  Support a local small business that gives back to our community

Thank you for being part of the Vulcan family.
Your support helps us continue to care for you better.
