

TFG Technology Solutions (Addewa.Ai) Job#:11-106: Full Stack Developer

Location: United States of America (Remote)

Job#: 11-106: Full Stack Developer

Role Overview

Addewa AI and TFG Technologies are seeking a skilled Full Stack Developer with hands-on experience in both front-end and back-end development, modern web frameworks, and cloud platforms. In this dynamic position, you will architect, build, and optimize secure, scalable solutions for enterprise and federal clients. Your ability to develop responsive user interfaces, implement robust server-side logic, and integrate automation tools will be essential for delivering innovative, audit-ready applications that drive key organizational initiatives.

Key Responsibilities

- Design, develop, and maintain full-stack web applications using modern frameworks (such as React, Angular, .NET, Node.js) and cloud services (Azure, AWS) for clients in federal and highly regulated sectors.
- Collaborate with stakeholders and project managers using tools like Jira and Confluence to gather requirements, track progress, and ensure project transparency.
- Integrate automation and workflow solutions, leveraging platforms such as UiPath and SharePoint, to improve efficiency and support compliance.
- Optimize applications for performance, scalability, and security, adhering to best practices and industry standards.
- Partner with internal teams to assess existing systems, recommend technical enhancements, and support rapid deployment of web projects.
- Stay up to date with emerging technologies and contribute to the continuous improvement of development methodologies.
- Mentor junior developers and share technical expertise to foster growth and innovation within the team.
- Apply analytical and troubleshooting skills to deliver reliable, high-quality solutions that meet client objectives.

Core Competencies

- Full-stack web development & technical leadership
- Modern frameworks (React, Angular, .NET, Node.js)

V.2 December 30, 2025

TFG Technology Solutions (Addewa.AI) Job#:11-106: Full Stack Developer

- Cloud platforms: Azure, AWS
- Automation tools: UiPath, SharePoint
- Project management & effective communication (Jira, Confluence)
- Compliance-driven development & secure coding practices
- Mentoring and collaborative teamwork

Qualifications

- 5+ years of experience in full stack development, cloud solutions, or related roles within technology, SaaS, federal contracting, or AI-driven organizations.
- Proficiency in deploying web applications using modern frameworks and integrating with automation platforms.
- Experience leading or contributing to development projects in multi-stakeholder or compliance-focused environments.
- Excellent communication, problem-solving, and teamwork skills.
- Familiarity with regulated industries for government or enterprise clients is preferred.
- Bachelor's degree in computer science or a related field required; advanced degree or relevant certifications (e.g., AWS/Azure Developer, PMP) are a plus.

Why Addewa AI?

- Join a team with deep federal expertise and a pragmatic, demo-first culture.
- Help agencies modernize operations, automate compliance, and deliver measurable mission outcomes.
- Work with cutting-edge AI and automation tools, including exclusive partnerships for no-code automation platforms.
- Be part of a people-first organization that values upskilling and human decision-making.
