

# TEACH TECH U

## WHEN AI ENTERS THE ESSAY

### Protecting Teacher Judgment, Student Voice, and Academic Integrity

#### Why this matters now

Schools are beginning to face difficult situations involving suspected AI use in student writing. What starts as a classroom concern can quickly become a larger issue involving policy, grading, trust, student advocacy, parent questions, and administrative review.

#### This workshop helps schools:

Clarify acceptable and unacceptable AI use

Understand the limits of AI checkers and detectors

Create fair response protocols before penalties are assigned

Protect teacher judgment while honoring student voice

Strengthen writing-process practices that support authentic authorship

Prepare end-of-year and back-to-school AI norms

#### Ideal for

- Principals and assistant principals
- ELA departments and instructional coaches
- District curriculum, innovation, and technology teams
- Schools planning summer PD or fall AI guidance

#### Presented by

**S. Hope Davis**

Founder & CTO, Teach Tech U  
AI education consultant focused on human-centered AI solutions for schools and educators

*AI should not replace educators — but it does require schools to establish clear norms, fair responses, and practical guidance.*

### Now Booking End-of-Year Consulting and Summer PD

WORKSHOPS • LEADERSHIP SESSIONS • DISTRICT CONSULTING
