

# Teach Tech U — Human-Centered AI Adoption

AI readiness, policy guardrails, PD, and implementation support—without panic or hype.

## What we do

Teach Tech U helps districts adopt AI clearly, ethically, and practically—so staff and students stay confident, safe, and in control. We blend district leadership strategy with classroom-real workflows and guardrails that people can actually follow.

Based in Raleigh–Durham, serving districts across NC (and beyond).

## Engagement Options

*(Choose one starting point—or stack them as a phased rollout.)*

### 1) AI Readiness Assessment (2–3 weeks)

A rapid audit of district conditions for safe, consistent AI use.

**Includes:** stakeholder intake, policy/tool review, risk & readiness scan, current-state summary

**Deliverable:** prioritized roadmap (quick wins + 30/60/90-day next steps)

### 2) Policy + Guardrails Workshop (1–2 sessions)

Co-create practical “rules of the road” for staff and students.

**Includes:** privacy expectations, transparency norms, acceptable use, disclosure language

**Deliverable:** district-ready guardrails + rollout talking points / FAQs

### 3) Classroom-Safe PD (60–120 minutes or half-day)

Professional learning that builds confidence without sacrificing judgment, identity, or student data.

**Includes:** safe teacher workflows (planning, feedback scaffolds, differentiation supports) + boundaries

**Deliverable:** ready-to-use teacher artifacts and classroom implementation steps

### 4) Implementation Partnership (30–90 days+)

Ongoing leadership support to roll out AI responsibly and refine as you learn.

**Includes:** training sequence, communications support, feedback loops, iteration cycles

**Deliverable:** adoption that sticks (not a one-off event)

---

## What districts get (every engagement)

- Practical next steps (not theory)
- Clear guidance that reduces confusion and risk
- Staff confidence and shared language across schools
- Documentation leaders can use to align decisions and communication

---

## Your next step

**Schedule a consultation** to confirm fit and recommend the simplest starting point.  
Prefer procurement-first? **Request a proposal** and we'll respond within 1–2 business days.
