

FAIRWIND
LEARNING CENTER

Preschool I
Miss Gail, Miss Ann and Miss Franny

Week of March 18-21, 2024

Here's A Peek Into Our Week:

The children explored with a variety of our transportation themed activities.

They loved using magnetic blocks with the light table in our Science Center.

We had air transportation vehicles along with other fun materials for the children to use at the playdough table.

The art center continues to be a favorite place to visit during free play time.

Our sensory table was set up as a construction site.

We had fun with water play.

We used shaving cream for clouds.
The children loved using the toy airplanes to hide in the clouds.

We completed many projects this week, including making airplanes.

We decorated wooden craft sticks and assembled them to make an airplane.

We made colorful hot air balloons.

The children were very interested in our science experiment. We mixed vinegar and baking soda in a plastic bottle, then added a balloon on top. The children were so excited to watch as the balloon began to fill with air.

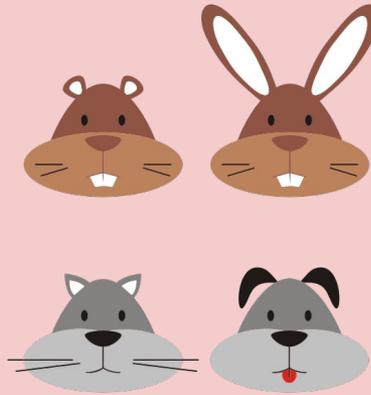

Mini Movers

We watched the TK class practice their show "The Very Busy Spider." We all agreed they did a great job!

This week's theme is ***Pets***. If you have a photo of your pet, we'd love to display it in our classroom.

Thank you

Important Dates for April:

April 10th- Mini Movers

April 15-19th- Spring Recess (No School)

April 25th - Music With Dara
