Integrate all Ophthalmic diagnostic imaging into one web-based platform

DICOM

Azure Based Architecture

LDAP

Modaily Worklist

HTML 5

Legacy Device Support

HL7

High Availablity

Historical Data Import

CONTINUUM

CONTINUUM is a completely web-based Image Management System used to connect all Ophthalmic diagnositc imaging devices into one application.

Azure Based Architecture

CONTINUUM
is built using Azure Based Architecture offering modern workflow and security

HTML 5

CONTINUUM
is built on HTML 5 web-based language and protocols

High Availability

CONTINUUM
offers configurations for High Availaiblity enviornments

DICOM Interface Engine

CONTINUUM
offers a fully functional interface for all DICOM complaint devices

Modaily Worklist

CONTINUUM
can be the Modality Worklist for all DICOM complaint devices

HL7 Interface Engine

CONTINUUM
offers HL7 ordering and resulting interfaces with an EMR (ADT, ORM, ORU)

LDAP Support

CONTINUUM
offers user configurations through your existing LDAP infrastructure

Legacy Device Support

CONTINUUM
can intergrate with Non-DICOM devices

Historical Data Import

CONTINUUM
can import Historical data from devices or other Image Management Systems

CONTINUUM
