

KALOSMI FOUNDATION

“VRUKSHAM RAKSHITO RAKSHITAH”

Why are we saying this? Before that let me tell you a CROW STORY.

In a group of trees around a palace, there were many crows.

In that 2 crows were talking, here is the conversation.

Crow1- this summer is very hot.

Crow2- bro summer is hot but I heard a news hotter than summer!

Crow1- what?

Crow2- yes bro. yes summer is hot but we can sustain it because of this shelter. But tomorrow onwards this shelter will disappear!

Crow1- why bro? what it means?

Crow2- I heard a news, Humans are constructing a (greedy)structure. So, they are destroying it.

Crow1- Is it! Let us protest! Ka ka ka.....!

Crow2- I think your protest could be a silly action, it doesn't matter how many times you shout no body will here our voice! they have neglected our rights (humans make rights only for themselves)

Crow1- I don't get it, what's happening? One who dominates earth, he keeps destroying earth for his own different needs.

Crow2- I've already said no one cares about us! but I believe that nature will come to a decision.

Friends these crow stories doesn't have endings. Let us know straight away what is the issue!

In front of **Lalithmahal palace(mysore)** govt is planning to construct a helipad in an area 4 acres of biodiverse land. Because of this around 200 trees of different species and bio diversely rich flora and fauna will be in threat.

It has to be preserved .

We know economists , industrialists etc., will be saying that development and urbanization is very important, considering their view, it would be better to choose many other locations available which will not affect biodiversity.

So, forest dept has given public notice to citizens under Karnataka tree protection act to file an objection, 23/04/2021 is the last date.

Please file an objection before last date through mail/post/in presence at 11am a meeting for public opinion.To mail an objection please refer to the email dcfmdm@gmail.com

With Regards

Team Kalosmi

VRUKSHAM RAKSHITO RAKSHITAH - I think now you've understood why we said these words.

If you find any environment related issues please mail us kalosmifoundation@gmail.com
