

## Close to 300 bags were collected!

Bag after bag came aboard, filled with food that will help stock the pantry shelves and provide meals for Rushford-area families who could use a little extra help.

There is something especially meaningful about this tradition. We spend the summer enjoying everything Rushford Lake gives us—beautiful days on the water, family gatherings, friendships, sunsets, happy hours and memories. As the season winds down, this is one simple way we can give something back to the community that surrounds our lake.

### AFTER

And it really is amazing how quickly the little things add up. A can of soup, a box of pasta, a jar of peanut butter or a few cans of vegetables may not seem like much on their own. But when an entire lake joins in, suddenly you have **nearly 300 bags of food.**

A heartfelt **THANK YOU** to everyone who filled a bag and left it on the dock, and to all the volunteers who distributed bags, captained boats, hauled groceries and helped get everything to the food pantry.

**Nearly 300 bags. One very generous lake community.**

And maybe the best kind of dockside pickup there is.

**Thanks, Rushford Lake. You came through again.**
