

## Theodorou Foundation Surpasses \$40,000 Goal on GoFundMe, Commits to Expanding Support for Chronically Ill Patients

The Theodorou Foundation, established in honor of the late Elias Theodorou, has reached a significant milestone by surpassing its initial \$40,000 fundraising goal on GoFundMe. Elias Theodorou, known for his unwavering strength and determination, faced immense health challenges with trademark Spartan stoicism during the final phase of his life.

In his courageous battle against these challenges, Elias recognized the extensive resources required to access the standard of care he deserved. His personal journey shed light on the arduous path that chronically ill individuals navigate within the medical system to acquire essential support.

Despite his own health struggles, Elias exemplified selflessness, dedicating his energy to helping others facing similar battles. Amidst multiple rounds of chemotherapy, he resolved to establish not one but two not-for-profit organizations, Theodorou Foundation and Higher Access. These entities, initiated with assets from Elias's estate, aim to provide educational resources and facilitate access to essential medical support for patients grappling with the complexities of the healthcare system.

"Elias always had a heart for others, and his legacy embodies this compassion," said Lachlan Cheng, a representative of the foundation. "He envisioned a world where individuals confronting health challenges could access the same resources and information that aided him in his journey."

The overwhelming support received on the GoFundMe campaign underscores the resonance of Elias's mission. The Foundation aims to further enhance these bequests and expand their impact, continuing Elias's work towards greater accessibility and support within the medical community.

Donations to the Theodorou Foundation will contribute directly to advancing Elias Theodorou's vision of aiding patients in navigating the complexities of healthcare, ensuring they receive the care they rightfully deserve.
