

Let us know about your Internet Service.

Mohawk Economic Development District, Inc (MVEDD) is hosting a brief online survey for both residents and businesses in Herkimer and Oneida Counties. We want your opinion on your **broadband quality and service**.

The survey is now available at www.MVEDDbroadband.com.

Why is this assessment taking place?

MVEDD wants to ensure the residents of Herkimer and Oneida Counties have the same opportunities in accessing broadband services as others in the state. This assessment allows the counties to obtain input directly from its residents to see where the greatest needs are and to advance broadband availability.

Privacy of responses will be protected.

MVEDD will NOT release information from this assessment to any third party. Aggregated results of the study will be made available at the conclusion of this project.

Why do we ask for your address?

We ask for your address to help us align the responses and identify via mapping technology where the greatest needs in our counties are.

Why is broadband vital to the area?

The COVID-19 pandemic has magnified the need for strong connectivity as more professionals and entrepreneurs either start businesses or choose to work and live remotely. This is especially important in the communities within Herkimer and Oneida Counties that want to attract business activities and jobs.

The importance of broadband throughout Herkimer and Oneida Counties.

Broadband access is increasingly a part of everyday life. Agriculture is increasingly relying on technology, and even seeing a doctor virtually is becoming more common. People of all ages access the Internet to shop, stream movies, and play games. All of these activities require strong and reliable broadband access. Businesses making decisions on investment seek well connected communities.
