

# CONSULTATIONS AND HANDS-ON COACHING FOR EMPLOYERS AND ORGANIZATIONS

## **One Poke. One Style. Many Smiles. Consultations and Hands-On Coaching**

### ***Get Your Quote Today!***

The Pediatric Phlebotomy Enhanced hands-on training session is designed to enhance the skills of already trained allied health professionals in the field of phlebotomy. Specializing in safe pediatric phlebotomy skills.

#### **Intended Audience:**

- Phlebotomists, Medical Assistants, Nursing Assistants, Registered Nurses, and all medical professionals who are already drawing blood specimens or certified as Phlebotomists.
- Those who are Phlebotomists may have encountered a low volume of pediatric patients and/or experience.
- Allied Health Professionals who are skilled at phlebotomy, but are looking to enhance their skills or may have never performed phlebotomy procedures on pediatric patients.

### **Hands-On Training Education Outline**

#### **Attendees will be able to:**

- Perform safe, efficient, and successful venous blood collection with less stress and trauma to the health professional and patient
- Feel more confident in their ability to successfully perform venous blood draws on pediatric patients.
- Lessen chances of having to send patients to a different facility to be drawn.
- Perform a venipuncture with minimal assistance, freeing up staff to perform other important tasks.
- Produce higher quality specimens by following the safety procedures and steps taught by Pediatric Phlebotomy Enhanced

#### **Awards:**

All attendees will receive continuing education units upon completion of this hands-on training session.
