

INDIVIDUAL WORKSHOP TRAINING

One Poke. One Style. Many Smiles. Pediatric Enhanced Continuing Education Workshop

The Pediatric Phlebotomy Enhanced Continuing Education Workshop is designed to enhance the skills of already trained/educated allied health professionals in the field of phlebotomy. Specializing in safe pediatric and adult phlebotomy skills.

Intended Audience:

- Phlebotomists, Medical Assistants, Nursing Assistants, Registered Nurses, and all medical professionals who are already drawing blood specimens or certified as Phlebotomists.
- Those who are Phlebotomists may have encountered a low volume of pediatric patients and/or experience.
- Allied Health Professionals who are skilled at phlebotomy, but are looking to enhance their skills or may have never performed phlebotomy procedures on pediatric patients.
- Allied Health Professionals who may have received medical education in the field of phlebotomy and want to enhance their education and skills in phlebotomy.

Learning Objectives Focus Points:

- Addressing specific challenges that may occur with phlebotomy, with more intense focus on pediatric phlebotomy procedures.
- Putting patients at ease.
- Vein assessment and selection. Reiterating the importance of feeling for veins rather than going by sight or anatomy.
- Positioning and holding techniques.

After completion of this continuing education workshop the attendees will be able to:

- Describe safety precautions for adults and pediatrics.
- Demonstrate positioning and holding techniques that promote safety and success.
- Perform a safe, efficient and successful venous blood collection with less stress and trauma.
- Feel more confident in their ability to perform a venous blood draw especially in pediatric patients.
- Perform a venipuncture with minimal assistance.
- Provide exceptional care to not only the pediatric patient, but all who are present with the patient.

Awards:

All attendees will receive continuing education units upon completion of this continuing education workshop.
