EAT MY PIZZA

Commercial Hospitality Interior - Design & Technical Drawing Package

PROJECT OVERVIEW

A distinctive hospitality setting designed around customer experience, workflow and material character

The interior concept creates a memorable dining environment through a warm terracotta palette, curved architectural elements and carefully layered lighting.

Ribbed timber ceilings, burgundy glazed tiles, marble worktops, brass details and upholstered seating work together to form a cohesive and inviting identity.

Scope: concept design, 3D modelling, photorealistic visualisation, detailed joinery coordination, bar/service layout and technical drawing package.
