

ROUTINE CARE AND MAINTENANCE

METALLIC BONDED	<ul style="list-style-type: none"><li>• Metallic Bonded and Crystal Quartz Bonded S3 Surfaces™ require very little maintenance.</li><li>• Routine dust should be removed by periodic vacuuming or with a soft brush.</li><li>• Do not use harsh abrasives, chlorine or solvent based cleaners, acids, or cleaning tools containing carbon steel, such as steel wool or wire brushes.</li><li>• Fingerprints, smudges, dust and dirt can be removed by using a clean &amp; damp microfiber cloth with an ammonia-free and mild water-based cleaner.</li></ul>
CRYSTAL QUARTZ BONDED S3 SURFACES™	

DISINFECTING NON-POROUS SURFACES

- Metallic and Crystal Quartz Bonded S3 SURFACES™ are non-porous surfaces that have been tested and can be successfully disinfected with a **diluted** disinfectant, fungicide, virucide, mildew stat, and sanitizer that kills 99.9% of germs.
- The light streaking may occur some times and can easily be removed by rinsing the surface with a small amount of water and drying with a clean microfiber cloth.
- It is important to use a separate microfiber cloth for water than was used for disinfectant or sanitizer.
