

## Script for the Oxford Repeaters N1BBK, W1IF, W1OCA

This is \_\_\_\_\_ net control for this evening's Oxford County ARES Net. All interested licensed amateur radio operators are encouraged to participate in tonight's net.

This net normally meets each Monday evening at 19:30 local time, except for the first Monday of the month, on this linked repeater system, courtesy of N1BBK, W1IF, and W1OCA repeater owners.

This is a directed net. Please direct all traffic through net control.

The net is open to any stations with emergency or priority traffic.

(Insert this next paragraph ***during an actual emergency event activated by Oxford EMA only***:  
"The net is open to emergency or priority traffic will now take check ins from stations operating mobile or on emergency power.")

The net will now take check ins from Oxford County radio amateurs.

Stations beginning with A Alpha -Please give your callsign, name and location.

Stations beginning with K Kilo -Please give your callsign, name and location.

Stations beginning with N November -Please give your callsign, name and location.

Stations beginning with W Whiskey-Please give your callsign, name and location.

Now taking check ins from any stations any where: Please give your callsign, name and location.

Do we have any stations with ARES/CERT Comm announcements or information?

Station \_\_\_\_\_ go ahead with your traffic, bulletin, announcement.

.....

Are there any stations that need fills or have questions?

.....

Are there any other stations wishing to check in to the net?

Are there any other announcements at this time?

....

Are there any other stations wishing to check in to the net?

Please remember that we meet the first Monday of each month on line with Zoom at 19:00 local time. To join us via Zoom, please email Wayne at [n1yis@megalink.net](mailto:n1yis@megalink.net).

Thank you to Leo N1BBK, Bob W1IF, and W1OCA repeater owners for the use of this system.

Thank you to all the stations that stood by to allow us to have a clear operating frequency.

This is \_\_\_\_\_, net control for the Oxford County ARES net closing the net and returning the repeater to normal radio amateur use.

'73 and Good Evening \_\_\_\_\_ clear.

***If or when we move back to the KQ1L repeater system, please do the following steps. (Please note: with the change of the KQ1L 146.88 Mhz footprint in the recent months, the Oxford County repeater system still allows our members in the north of the county to participate in the weekly on air nets).***

***Three to four minutes prior*** to reading this script,

**Please listen for the stations that are using the repeater.**

If there are none, please ask, "Is the frequency in use?" If there is no response then announce, "We will be starting the Oxford County ARES Net in a few minutes. Are there any stations who wish to use the repeater before we start tonight's net?"

If the repeater is busy, when there is a break, courteously ask for a break for a very short announcement. **When** acknowledged and given the opportunity by the stations using the repeater, announce that the Oxford ARES net is moving to the Oxford repeaters.

Move to the closest Oxford repeater that you have a clear signal to and from. Please then listen to what stations are on the repeater.

If there are none, please ask, "Is the frequency in use?"

If there is no response then announce, "We will be starting the Oxford County ARES Net in a few minutes. Are there any stations who wish to use the repeater before we start tonight's net?"

Let them call and clear, then start with appropriate net script.

Please **NOTICE** there are now **two net scripts**. One is for the KQ1L system and one is for the Oxford Repeaters.

**Oxford County ARES/ CERT Comm Net Script for the Oxford Repeaters N1BBK, W1IF, W1OCA**

**Oxford County ARES/ CERT Comm Net Script for KQ1L repeater system.**

**Oxford County ARES/ CERT Comm Net Script for KQ1L repeater system.**
