

Very short bio:

[Sylvie Delacroix](#) is a professor in law and ethics at the University of Birmingham and a fellow of the Alan Turing Institute. Her interest in the infrastructure that molds our habits notably leads her to pay attention to the power imbalances that stem from our increased reliance on data-reliant tools. As a concrete way of mitigating the latter, she co-chairs the [Data trust Initiative](#). Her latest book -[Habitual Ethics?](#) Was published by Bloomsbury in August 2022. @SylvieDelacroix | <https://delacroix.uk>

Bio:

[Professor Delacroix](#)'s research focuses on the intersection between law and ethics, with a particular interest in habits and the infrastructure that molds our habits (data-reliant tools are an increasingly big part of that infrastructure).

She is considering the potential inherent in [bottom-up Data Trusts](#) as a way of reversing the current top-down, fire-brigade approach to data governance. She co-chairs the Data Trust Initiative, which is funded by the McGovern Foundation: see <https://datatrusts.uk>.

Professor Delacroix has served on the [Public Policy Commission on the use of algorithms in the justice system](#) (*Law Society of England and Wales*). She is also a Fellow of the [Alan Turing Institute](#). Her current work on bottom-up data empowerment infrastructure and the public domain is funded by Omidyar Network. Previously, Professor Delacroix's work has been funded by the Wellcome Trust, the NHS and the Leverhulme Trust, from whom she received the Leverhulme Prize. Her latest book -[Habitual Ethics?](#) Was published by Bloomsbury / Hart Publishing in August 2022. @SylvieDelacroix | <https://delacroix.uk>
