

## **Instruction Manual**

# **SLOOP PILLOW**

Please read to understand all the great benefits of this pillow.

1. To use the pillow as a neck pillow, simply hook the two ends of the pillow together.

2. To use the Sloop pillow for full lateral support to the upper body, unhook and extend the pillow. Unzip the hidden pocket, take out the strap and attach it to both ends of the hooks. Now you have a loop.

**3. Slide the strap between the headrest (wing on headrest) on the plane, or over the headrest of the bus, train or office chair, depending on where you want to use it.**

**4. Position the Sloop pillow across your torso.**

Depending on which side you wish to rest your head on, slide the opposite arm through the loop. Adjust the strap length and the position of the pillow to your comfort. Now you can lean and rest your head on the pillow and it will keep you from drooping.

5. If you don't have the option to slide the strap into a headrest, put one arm through the Sloop, position the pillow to your neck and simply slide the strap in the armrest of the plane, bus, train or office chair. Adjust the strap and pillow to your comfort. Now you can lean on the pillow and it will keep you from drooping.

6. To use the Sloop pillow as a back support just have it hang behind you and adjust the length of the strap to where you want your back to be supported.

**7. You have the option to put your valuables in the hidden pocket. Fall asleep with peace of mind as your items stay secure in the pillow while you sleep.**

8. When you get off the plane, simply pull the strap out of the headrest/armrest and put the Sloop pillow on like a cross body bag or clip it on your carry on luggage or backpack.

Adjustable for adults & kids older than 6 years
