The purpose of **agmax'** HF MAX is a soil conditioner designed to aid in breaking down organic matter. It can increase moisture retention in your soil. This is an activated humic and fulvic acid product that may enhance micronutrients uptake.

## DIRECTIONS FOR USE:

Mix in the recommended amount of 1 gallon of "H F Max" with 15 – 25 gallons of water. Shake well prior to mixing. When mixing with water, fill container half full, then add "H F Max" to remaining water. When mixing with pesticides, dilute "H F Max" with water prior to the addition of buffering agents and pesticides. **DO NOT** tank mix with carbonate based pesticides. Follow ALL directions and precautions on pesticide label prior to mixing with liquid carbon. **DO NOT** mix "H F Max" with calcium nitrate, phosphoric acid, zinc sulfate, or other solutions with a PH of less than 6.0
