We use 2 gallons every other week for well maintenance. Chlorine helps fight build-up of iron bacteria in the well shafts and feed lines to the storage tanks. The Board approved the well maintenance Chlorination. In addition, we will need several gallons or more for disinfecting the new T-1 storage tank and plumbing as it is reinstalled. Last reason: JoAnn asked me to get it because I have the debit card. Ray M.

Ray,

Thanks for getting me the debit card receipt.

I am curious what we use so much chlorine for, something water related or equipment related I would guess??
