

# Stations, Facilities & Accessibility (SF&A) Work and Asset Management

Presenters:

Nicole Cantwell – Sr Manager Asset Management, SF&A Malini Das - Sr Engineer/ EAM Functional Lead

### Agenda

#### Amtrak Connects Us

New era in passenger railroad

#### Enterprise Asset Management at Amtrak

- Asset management impact at Amtrak
- Path to Transformation
- MainLine Rail Maximo solution
- Evolving EAM landscape at Amtrak

#### Location Hierarchy

- Founding principles
- Real Estate, Mechanical, Infrastructure hierarchy
- SF&A location hierarchy

#### Enterprise Asset Management and SF&A

- Asset Management Goals
- Real World Scenarios

#### Current Status and Road Ahead

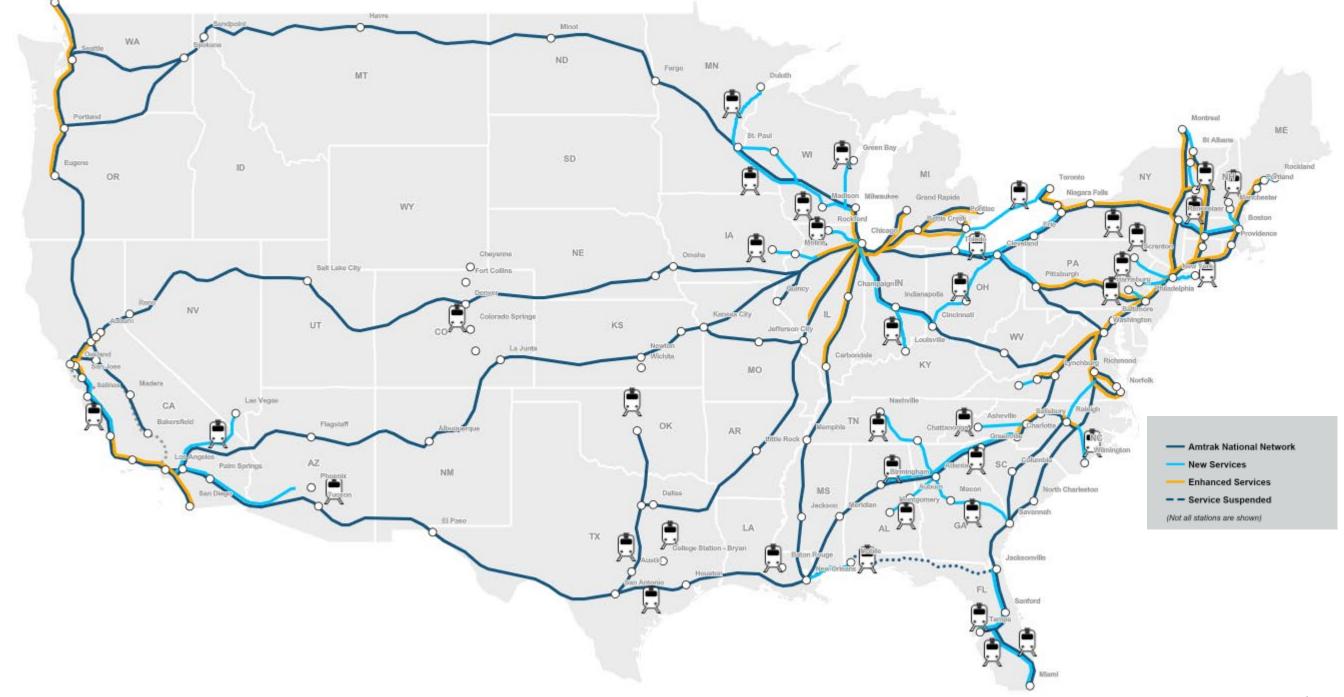

- MLR Solution Go Live
- Implementation at Baltimore Union Station
- Challenges
- Gen MWE Mobile Work Management Application
- High Level Timeline

### **Amtrak Connects US**

Amtrak, which began operations in 1971, is the United States' intercity passenger rail operator. With safety as the highest priority, our goal is to provide efficient and effective intercity passenger rail mobility with modern trains that offer friendly, high-quality service that is triptime competitive with other intercity travel options.

### **Enterprise Asset Management (EAM) Impact On Amtrak**

### Impacted Physical Assets

Signals & Comm. Right of Way Key Engineering Safety & Security Areas

Locomotives

Bridges & Tunnels

**Passenger Cars** 

**Facilities and Stations** 

### Asset Management Drives Outcomes That Support:

#### **Right Of Way; Track, Signals & Communications, Electric Traction, Bridges & Tunnels:**

- Implement PTC or achieve PTC-levels of safety across Amtrak's network and deploy new technology to strengthen safety performance
- Develop and execute FAST Service and Asset Line plans
- On-time performance

#### Locomotives & Passenger Cars:

Achieve New Acela and new fleet goals on budget, cope, schedule and train performance

#### Stations, Facilities, & Accessibility:

- Achieve ADA compliance goals
- Fully implement Stations Repair & Clean Up Program and develop & implement a system-wide station and train signage and branding plan

#### Other:

- Train Safety Metrics:
  - No NTSB defined rail passenger accidents
  - No employee fatality or FRA serious injury
  - Lower Customer and Employee FRA Reportable injury rate
- Achieve IT security goals of zero cyber security breaches
- Operate services in accordance with Annual Operations Plan levels

# **Riding History Into the Future**

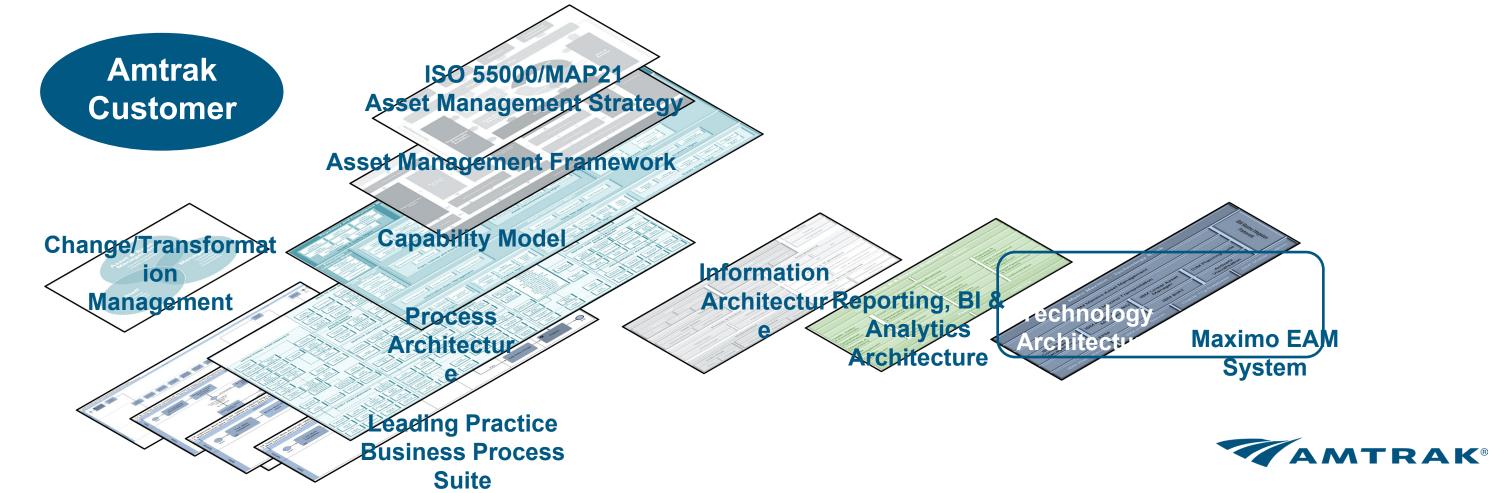

### And a Path to Transformation

AMIRAK

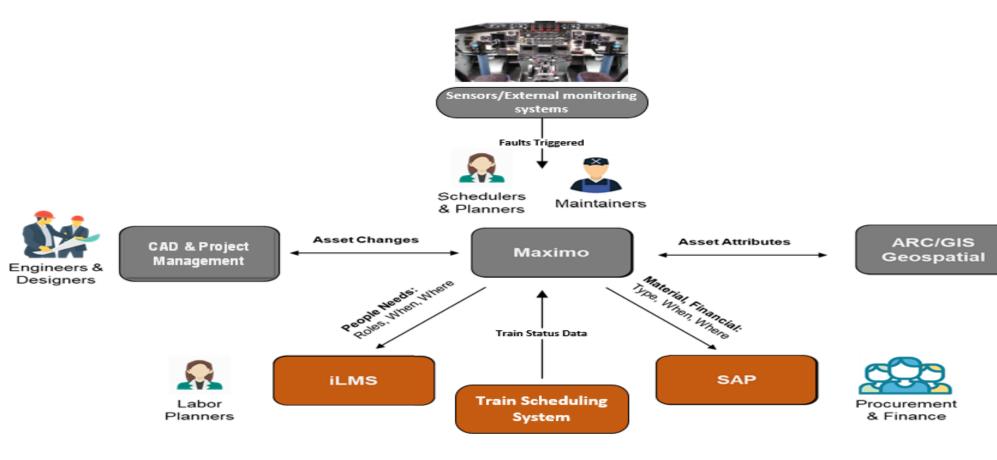

# MainLine Rail Maximo Industry Solution

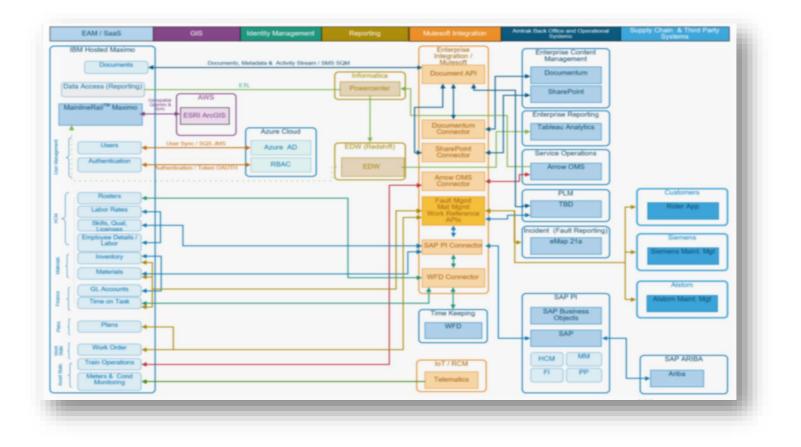

- Workflows encoded with 1000+ optimized and automated processes covering end-to-end asset and safety management leading practices
- Mobile solution providing real-time access to full asset details and maintenance history of assets--at the job site
- Real-time access to actual or nearby hazard information that can be updated on the move, constantly improving quality of hazard data
- Maximo 7.6.1 with Industry solution MLR hosted at IBM CDS

### **Evolving EAM Landscape at Amtrak**

- No Single Tool 'does it all'
- Unified platform approach
- Cloud first and mobile first platform
- maintenance records
- management

Complete asset management workflows and controls Anchor for Amtrak asset management standard Integration with future fleet technologies for FRA standard of reporting for all asset and work

### **Amtrak Location Hierarchy**

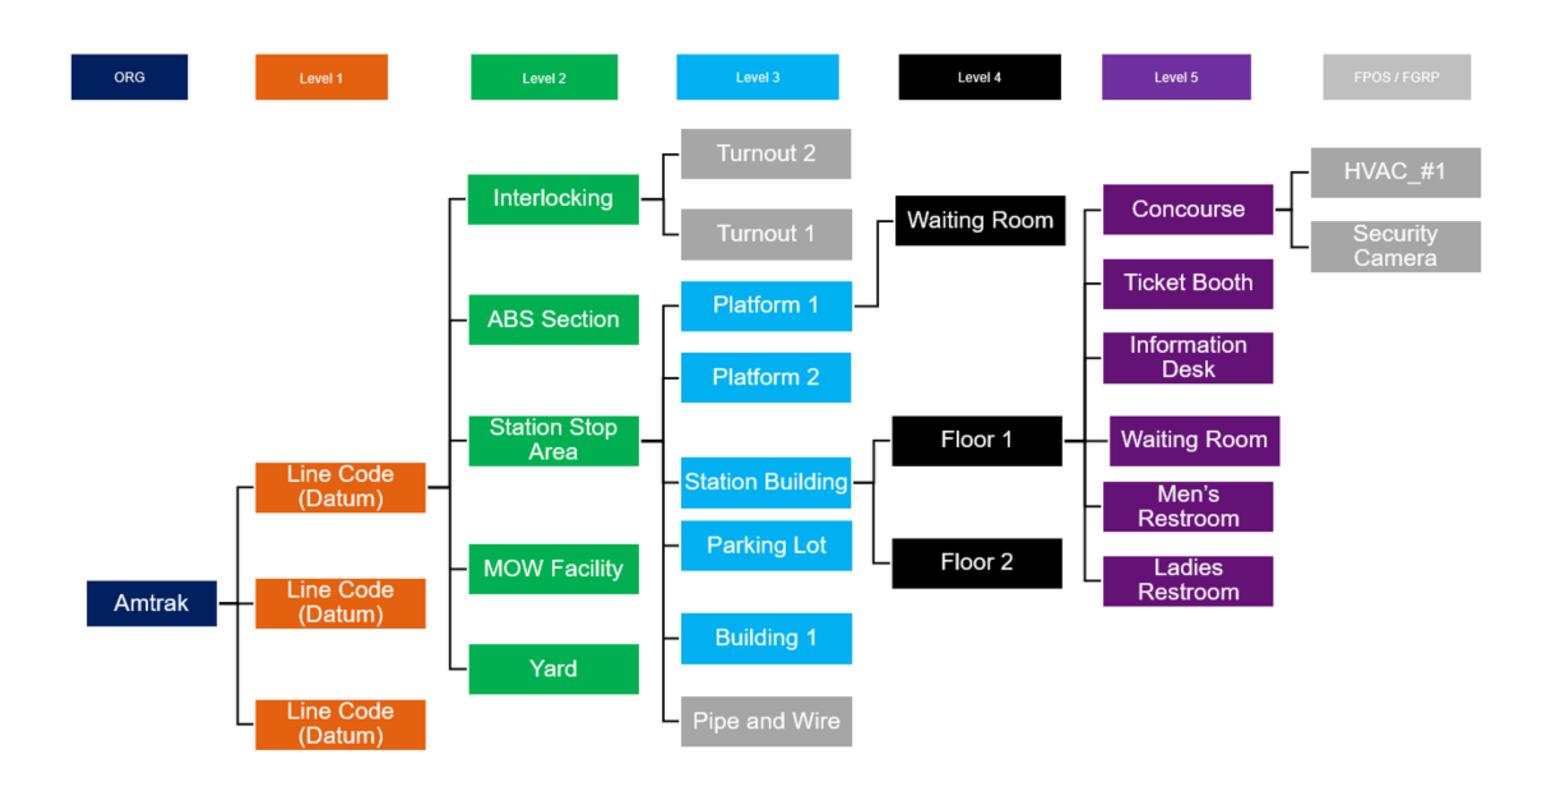

# Various Location Levels

# How it ties within all three departments

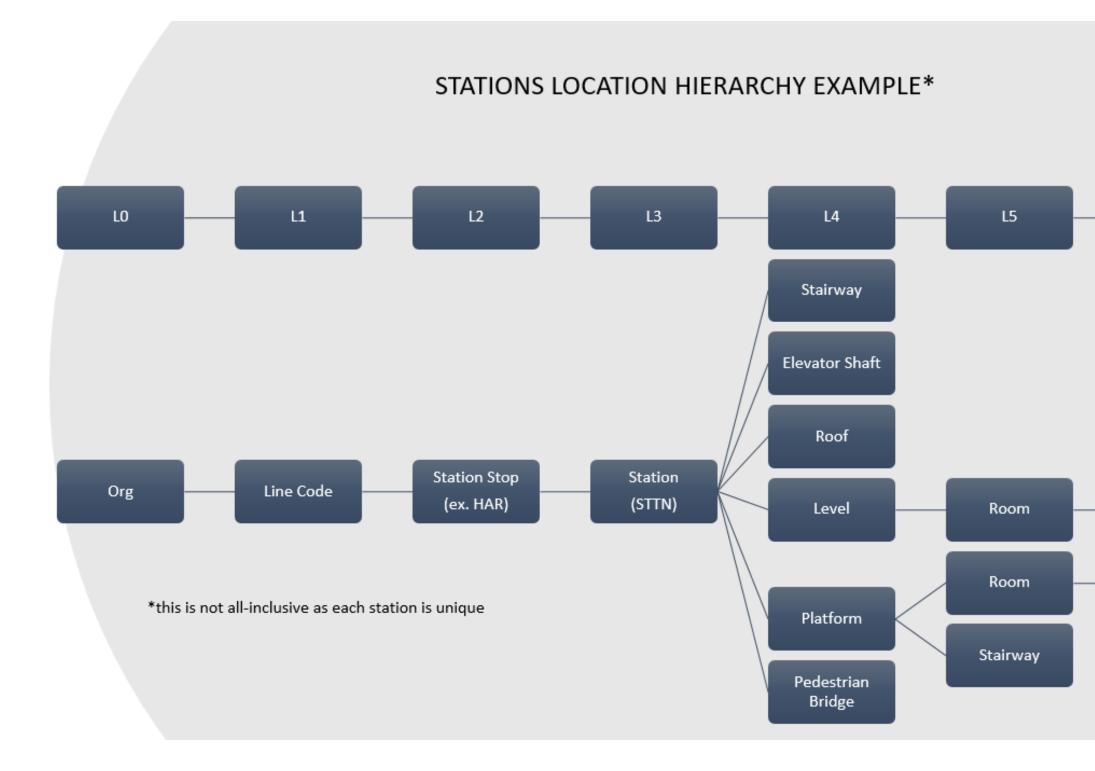

### **Amtrak (Proposed)Physical Location Hierarchy**

### **SF&A Hierarchy**

FPOS – Functional Position

FPOS (ex. Fire Pump)

FPOS (ex. Electrical Panel)

### EAM Goals for SF&A

#### Single source of truth $\bullet$

Information about our Stations and Facilities assets and their attributes is consistent, reliable, efficient, and meets federal reporting and compliance regulations

#### Advanced reporting

Data driven decision making on capital investment and reduction in unplanned  $\bullet$ downtime

#### Capture data/information that is falling through the cracks $\bullet$

Information should be in real time, not a moment in time  $\bullet$ 

#### **Data interoperability** $\bullet$

Develop standards to allow information to be shared across systems

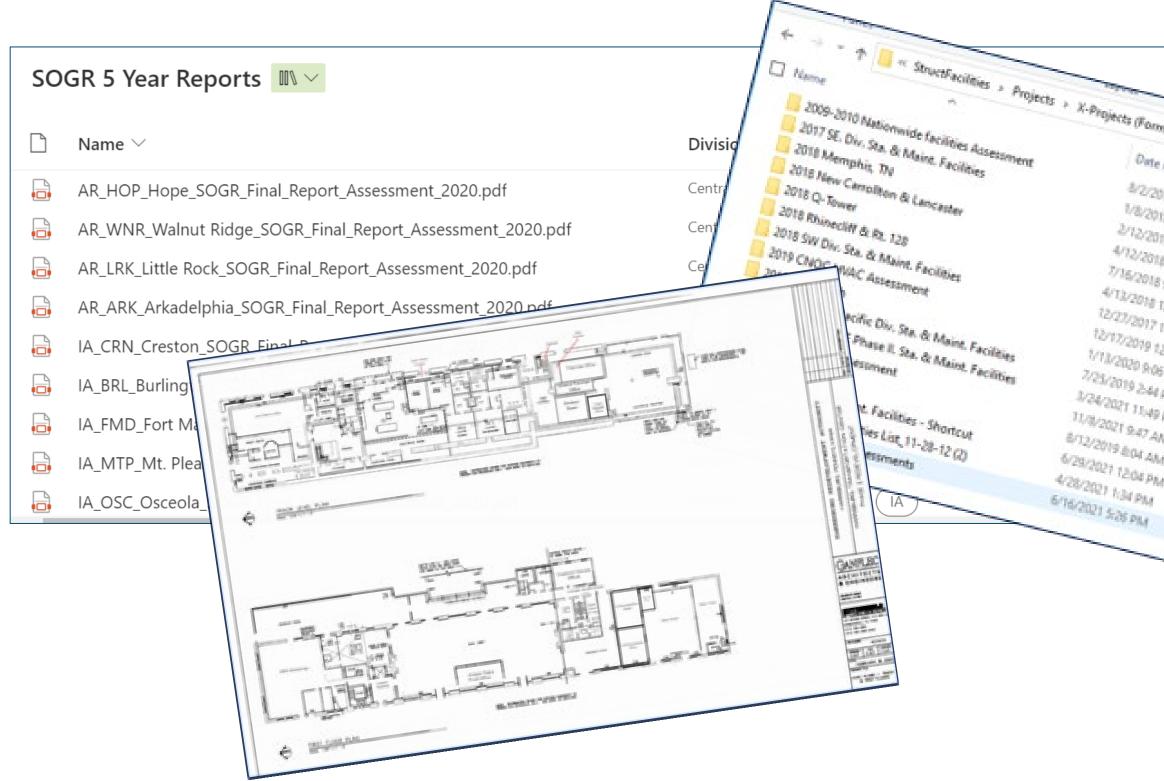

### Real World Scenario #1 – Single Source of Truth

The Director of Sustainability contacts us for specific station information to support her team's vulnerability assessment...
