

Crystal Water Products I-5S

Great Tasting water at every faucet and shower. Organic chemicals, chlorine, chloramines, pesticides, bad taste, odors, and more are easily reduced with the I-5S.

- Catalytic Coconut Shell Carbon greatly reduces chlorine, chloramines, and organic chemicals.
- Natural Clinoptilolite reduces sediment down to 3-5 microns for greater water clarification.
- High density Almandine Garnet Gem Mineral filters water down to 10-20 microns.
- Quartz media for enhanced distribution and cleaner water.
- Oxy-Mag- Featuring a “Tri-Pole” magnetic field, a strong neodymium magnetic module. The water starts it’s journey entering the pressure reduction chamber which slows the velocity allowing for enhanced magnetic field contact as the water envelopes the magnetic module. Thus limiting hard water scale.

System	Size (WxH)	Inlet (In.)	Model Number
CWPI-5S	10"x54"	1"	CWP5S-1
CWPI-5S	12"x52"	1-1/4"	CWP5S-114
CWPI-5S	13"x54"	1-1/2"	CWP5S-115

Warning: The Crystal Water Products I-5S is intended to treat potable water provided by municipal water provider. While it may effective at treating well water please contact us for a full water analysis before installing on well water systems. The Crystal Water Products I-5S is NOT a water softener and should NOT be sold as one. It is designed for limited scale reduction in constantly wetted areas only. We offer a full line of water softeners when the application requires.
