

Crystal Water Products SS

This system is primarily used to make hard water soft. Hard water is the most common water problem found in a household. It is common in inner city areas, places where there is often hot weather, low rainfall and high mineral content in the soil. This high capacity water softener is effective at reducing the hardness, iron and scale from your water.

Photo

- Softens water, reducing hardness, iron and scale
- Cut spending on detergents and other cleaning supplies by up to 50%
- Machine washables will rinse cleaner, feel softer and retain color longer
- No more soap film or hardness residue
- High flow valve and tank ensures continuous water pressure and flow
- Adapts to the daily water usage and ensures optimum efficiency and dependability
- Digital demand regeneration valve with bypass valve preinstalled

System	Size (WxH)	Inlet (In.)	Model Number	Grains
CWPSS	10"x54"	1"	CWPSS-1	36,000
