

# Playology Clinic

**Understanding children.  
Partnering with families.  
Supporting real-life change.**

Playology Clinic offers psychology, occupational therapy, and speech pathology for children and families.

We work to understand each child's unique way of thinking and responding, and use that understanding to support growth, regulation, and connection. Our therapy is purposeful and tailored — focused on meaningful goals and real-life change, not therapy for therapy's sake.
