ADJUSTING YOUR MAGICBAX™

EARRINGS TOO TIGHT?

Place your MagicBax™ Earring Lifters on a flat, stable surface (like a table). Insert a credit card, or even your fingernail, between the two backing clips to loosen the clutch. Then insert your earring post into the MagicBax™ to test the loosened fit.

EARRINGS TOO LOOSE?

With your fingers, pinch the MagicBax™ Earring Lifters backing clips together to tighten the fit. Insert your earring post into the MagicBax™ to test the tightened fit. If further tightening is required, you can use needle-nose pliers very gently and in small steps, to increase the tension. NOTE: Be careful not to crush the shape of the clutch itself while tightening.

For more tips, visit: www.MagicBaxTips.com

USING YOUR MAGICBAX™ EARRING LIFTERS

1

Slide the MagicBax™ onto your earring post as you normally would. The flat back should face your earlobe.

2

The heart-shaped end should face upward. Adjust until the desired lift is achieved.

Wear your earrings with confidence! A comfortable lift and secure fit for all day wear.

MAGICBAX™ TIPS

- The silver MagicBax™ earring lifters are 100% sterling silver. Clean with jewelry or silver cleaner as needed.
- The gold MagicBax™ earring lifters are gold-plated sterling silver. Use jewelry cleaner as needed.
- Store MagicBax™ earring lifters in their storage case when not in use.
- Not intended for children under 15 years of age.
